1971 The Gates of Hell crater was created in 1971 when a Soviet drilling rig accidentally punched into a massive underground natural gas cavern, causing the ground to ...

While drilling in 1971 Soviet geologists tapped into a cavern filled with natural gas. The ground beneath the drilling rig collapsed leaving a large hole with a diameter of 70 m.

In 1971, a Soviet drilling rig accidently punctured an underground natural gas cavern. To head off a environmental catastrophe, the Soviets set the gas on fire.

While drilling in 1971 Soviet geologists tapped into a cavern filled with natural gas. The ground beneath the drilling rig collapsed leaving a large hole with a diameter of 70 m. To avoid ...

The hole in Derweze, Turkmenistan, was created in 1971 when a drilling rig used by Soviet geologists

1971 soviet drilling rig

collapsed. The team decided to burn off poisonous gases inside the crater ...

The hole in Derweze, Turkmenistan, was created in 1971 when a drilling rig used by Soviet geologists collapsed. The team decided to burn off ...

In 1971, a Soviet drilling rig collapsed into a giant natural gas cavern in Turkmenistan. To prevent the spread of methane, geologists lit it on fire. They thought it would burn out in weeks.

Its origins date back to 1971 when a Soviet drilling operation accidentally struck an underground cavern filled with natural gas. The ground beneath the rig collapsed, creating a ...

When a Soviet drilling rig unintentionally punched into a large subterranean natural gas cavern in 1971, the ground collapsed and the drilling ...

In 1971, a Soviet drilling rig collapsed into a giant natural gas cavern in Turkmenistan. To prevent the spread of methane, geologists lit it on fire. They thought it would ...

The Flaming Birth of a Fiery Beast In 1971, Soviet geologists drilling for natural gas in Turkmenistan's Karakum Desert struck a massive ...

Diverse narratives exist on the formation date and process of the Gates of Hell. The most prevalent theory states that the crater was formed in ...

In 1971 a Soviet drilling rig accidentally punched into a massive underground natural gas cavern, causing the ground to collapse and the entire drilling rig to fall in. Having punctured a pocket of ...
