

4 rock auger bit

What size is a bullet rock auger?

A large range of rock auger bits from 6" to 36" diameter in order to suit auger drives for mini excavators, skid steers and mini skid steers. All bullet rock augers have a 2" hex output shaft which is the universal standard for the US. Bullet Auger Range - 6" to 36" - Bullet Teeth & Pilots Ideal for hard rock and high wear conditions!

What are rock auger bits?

Rock auger bits are bits with a reinforced fabricated boring head, double wrapped flighting, and conical carbide teeth. They have a standard 'fishtail' center point and are not intended for use in concrete or asphalt applications.

Who makes the best auger bits?

Over 35 years of design and development has produced the highest quality range of augers on the market today. Manufactured by Diggain Iowa, we offer earth auger bits as well as rock auger bits and bolt on teeth augers. They are suited for skid steer loaders, track loaders, tractors, backhoes, excavators and mini stand on compact loaders.

What is an Earth Auger Bit?

An Earth Auger Bit, like the one featured, is a tool used for drilling holes in the ground. This specific bit is designed with a fishtail point, replaceable cutting blades, and a flex coil shock absorber for precision and control when drilling through tough soils.

What size auger bit is required?

Auger bits have a diameter of up to 80mm. They can be custom made to lengths of up to 2500mm. Auger Bits are indispensable if you need to drill especially deep holes into wood. The size of the auger bit determines the diameter of the hole. They have a large coiled chip space, whereby the chipped wood are carried out to the tool shank during the drilling.

What is a true cut Auger?

Digga's True Cut augers boast a heavy duty design, with high efficiency cutting heads to maximize your drilling performance. Fitted with a range of quality wear parts providing superior wear and performance. No need to have two augers for different conditions. Ideal in all drilling conditions.
