

6 rock auger bit

What size is a bullet rock auger?

A large range of rock auger bits from 6" to 36" diameter in order to suit auger drives for mini excavators, skid steers and mini skid steers. All bullet rock augers have a 2" hex output shaft which is the universal standard for the US. Bullet Auger Range - 6" to 36" - Bullet Teeth & Pilots Ideal for hard rock and high wear conditions!

What are rock auger bits?

Rock auger bits are bits with a reinforced fabricated boring head, double wrapped flighting, and conical carbide teeth. They have a standard 'fishtail' center point and are not intended for use in concrete or asphalt applications.

What size auger bit is required?

Auger bits have a diameter of up to 80mm. They can be custom made to lengths of up to 2500mm. Auger Bits are indispensable if you need to drill especially deep holes into wood. The size of the auger bit determines the diameter of the hole. They have a large coiled chip space, whereby the chipped wood are carried out to the tool shank during the drilling.

What is an auger bit file?

An auger bit file is a special type of file with single-cut teeth at either end. At one end, the wide flat faces have teeth, while the edges are smooth without teeth. At the other end, the edges have teeth and the faces are flat without teeth.
