

Af 180 drill rig

What is a AF 180D drill rig?

The AF 180D drill rig is mounted on Caterpillar base model 325 D HHP excavator base with a Caterpillar undercarriage with extensible lower from 3 to 4,3m. The AF 180D can drill with maximum diameter of 1800mm for a maximum depth of 60m. The operator station of the AF 180D is a particular example of comfort and rationality.

What is a Kelly AF drilling rig?

Kelly Tractor Co. is the North American distributor for Industria Meccanica Trivelle (IMT) high-performance drilling rigs. The IMT drilling rigs, known as the "AF" series, drill shafts from 16 to 118 inches in diameter, up to 295 feet deep. There are eight different "AF" models, each with a patented automatic interlocking Kelly bar.

What is the deepest depth an IMT AF drilling rig can drill?

The IMT drilling rigs, known as the "AF" series, drill shafts from 16 to 118 inches in diameter, up to 295 feet deep. There are eight different "AF" models, each with a patented automatic interlocking Kelly bar.

What is Af 180D?

The AF 180D is the machine that is best known by the biggest contractors of the world. Its success is due to its characteristics of operative comfort, stability, reliability and, most importantly, productivity.

How much traction does the AF 180D have?

IMT has chosen to use an expandable carriage made by Caterpillar on the basis of our technical specifications, giving enormous advantages. The actual traction force is 380 kN; this allows the AF 180D to move freely even in the toughest grounds. The length of the undercarriage is 5210mm, the shoes are 800 mm.

What control system does the AF 180D use?

The main controls, such as main winch, swing, rotary and crowd system are operated by means of two main joysticks. The drilling depth and pile verticality control systems are foreseen in the cabin. The AF 180D uses a CAT 325D HHP base.
