What is a screw air compressor?

As these screw air compressors are generally not equipped with any valves and have no mechanical forces that cause unbalance, these solutions can be extremely efficient for various applications. This is because a screw compressor works at a higher shaft speed and compresses a large volume of air with small exterior dimensions.

How does a screw compressor work?

A screw compressor can run loaded ('pumping air') or unloaded ('idle'). The inlet/loading valve opens and closes according to air demand. The inlet valve is controlled by a solenoid valve that supplies control air to the inlet/loading valve. Check solenoid valve coil and solenoid valve operation.

Who is screw compressor technologies?

Screw Compressor Technologies (SCT) located in Buffalo, New York has been in the air end rebuilding business since 1980. SCT will rebuild and restore any air and gas compressing unit to their Original Equipment Manufacturer (OEM) specifications.

Why should you choose SCR screw compressor?

Oil Injected Fixed Speed Compressor With R&D capabilities, can be customized on demand. WHY CHOOSE SCR traditional Series screw compressor SCR provides you with more energy-efficient equipment and more considerate services. 1. Final grinding by high precision grinding machine imported from UK, tolerance reach less than 6um, better efficiency.

Why does my compressor trip on over temperature?

If your compressor trips on over temperature, it could be any of the following: Ambient temperature too high or not enough ventilation. A screw compressor can run loaded ('pumping air') or unloaded ('idle'). The inlet/loading valve opens and closes according to air demand.

How do I know if my air compressor is working?

If you have a compressed air dryer, check the dewpoint. Check the current draw with a current clamp meter. If the motor draws excessive current: Try to turn the compressor by hand. It should be possible to turn it around. It should turn around smoothly, without any 'hiccups' (be sure to completely shut down the air compressor!).
