

Arctic-class drilling rigs

Our registered, professional engineering team is able to develop customized harsh environment offshore drilling rig designs for specialty environments like the arctic. These rig designs provide ...

Operators must select a drilling rig that is suitable to operate in the conditions the rig may encounter while drilling the planned well and be able to provide relief well drilling assistance to ...

Rig 257 is the world's only arctic-class barge rig, designed to drill year-round in conditions such as extreme temperatures, arctic ice, and reservoir conditions ...

Drilling in the Canadian Arctic peaked during the 1970s and 1980s, led by such companies as Panarctic Oils Ltd. in the Sverdrup Basin of the Arctic Islands, and by Imperial Oil and Dome ...

The impact of an oil spill on fisheries and threatened mammal populations is presently incalculable. Development and use of Arctic-class ice ...

Specific risks to offshore oil and gas operations manifest in the Arctic and other harsh environments. Such extreme operating conditions can disrupt the offshore infrastructure ...

As climate change melts Arctic sea ice, the ecologically important region faces unprecedented challenges and risks from both on and offshore drilling.

Whether it's drilling equipment, land or offshore rigs, drill strings, downhole equipment for wells, tubular goods, rods, or any other type of oilfield equipment, you will likely ...

Covering 95% of all work in Norway: The rigs are designed to operate at water depth up to 1200m (drill to 8000m) in air temperature of -25°C to meet the Ice ...

Founded in 1982, Nordic-Calista, now a wholly-owned subsidiary of Calista Corporation, stands strong in its commitment to providing practical and ...

Drilling in the Canadian Arctic turned out to be challenging and expensive, particularly in the offshore where drilling required innovative technology. Short operating seasons complicated ...

Design engineering and project management of the construction of arctic drilling rigs, arctic Mobile Offshore Drilling Units (MODUs) and arctic production platforms

A polar bear is spotted on a multiyear ice floe in the Beaufort Sea on Aug. 13, 2023. The Trump

Arctic-class drilling rigs

administration is planning to designate a new ...

“Over the past decade, GustoMSC has designed two arctic-class drillships for Frontier Drilling (now part of Noble Drilling), namely the Bully I and Bully 2. Here the intention ...

Kulluk was an ice-strengthened drill barge that was used for oil exploration in the Arctic waters. She was constructed by Mitsui Engineering & Shipbuilding in Japan in 1983 and operated in ...

The impact of an oil spill on fisheries and threatened mammal populations is presently incalculable. Development and use of Arctic-class ice-resistant oil rigs will be ...

Whether it's drilling equipment, land or offshore rigs, drill strings, downhole equipment for wells, tubular goods, rods, or any other type of oilfield ...

The Western Arctic Reserve is home to arctic animals and indigenous communities whose relationship with their caribou neighbors spans thousands of years. Soon, courtesy of ...

Kulluk was an ice-strengthened drill barge that was used for oil exploration in the Arctic waters. She was constructed by Mitsui Engineering & Shipbuilding in Japan in 1983 and operated in the Canadian Arctic until 1993 when she was mothballed for over a decade. In 2005, she was purchased and extensively refurbished by Shell PLC for drilling off the Alaska North Slope.

Abstract. The paper discusses the origins and development of a portfolio of Arctic mobile offshore drilling unit designs, comprising both jack-up type and drillship type solutions. ...

Shell Offshore Inc. recently renovated and upgraded two arctic-class mobile drilling units to evaluate some of its Beaufort Sea leases.

From full-scope exploration drilling services for geological surveys to the development and manufacturing of cutting-edge drilling rigs, ADC has you ...

Sumitomo Delivers Super-Class Arctic Drilling Rig To ODECO The Ocean Odyssey, a new super-class Arctic semisubmersible recently completed for Ocean Drilling & Exploration Company ...

The JBF Arctic drilling unit is designed to drill wells in arctic conditions, moored in ice infested waters with ice thickness up to approximately 2.0 - 3.0 meter.

Drillships are maritime vessels designed specifically for drilling deepwater oil and gas wells. More about drillship types, key features and advancements.

The industry's experience thus far drilling offshore the Arctic is a powerful argument to build a new

Arctic-class drilling rigs

generation of vessels and drilling rigs purpose built for operations in heavy ice. ...

Bouygues also formed Zeeland Parker with Parker Drilling to operate the unit, which would utilize a Parker Drilling Company Arctic land rig. More recently, Odeco introduced its all-steel Arctic ...

Arctic Offshore Rig Ability to deliver in a challenging market environment Arctic Offshore Rig is a leading offshore brokering and consultancy company with core expertise in sale and purchase, ...
