

Atlas copco explorac 100 reverse circulation drilling rig

The Explorac 100, available on a crawler chassis, is designed specifically for reverse circulation drilling and other down-the-hole drilling applications. It has ...

Explorac 100 - Reverse circulation drilling rigs The Atlas Copco Explorac 100 is a crawler-mounted rig, designed specifically for reverse circulation drilling.

Reverse circulation drilling rig The Explorac RC30 Smart has been designed from the ground up to be a robust and dependable part of an exploration operation. ...

We currently operate the following; Atlas Copco Explorac 100, Explorac 220, Schraam 450 & Smith Capital 10R3H for our Reverse circulation operations. Their drilling capabilities are ...

Atlas Copco's new Explorac 100 is a reverse circulation drilling rig designed specifically for exploration drilling to depths of 100-200 meters.

Atlas Copco's new Explorac 100 is a reverse circulation drilling rig designed specifically for exploration drilling to depths of 100-200 meters. It combines a compact and ...

The document discusses the Explorac 235 reverse circulation drill rig. It can drill holes from 150-200mm down to depths of 450 meters. It has remote-controlled operation for safety and ...

All Atlas Copco products are engineered to integrate seamlessly, ensuring the highest level of reliability and energy efficiency. As a result, Atlas Copco can take full responsibility for your ...

Built to take on tough challenges The Explorac RC30 Smart has been designed from the ground up to be a robust and dependable part of an exploration operation. This rig uses the Reverse ...

Explorac 220RC - Reverse circulation drilling rigs Technical specification Safe Working Environment With safety and ergonomics as key issues together with latest technology the ...

Explorac 100 is a crawler-mounted, compact rig specifically designed for reverse circulation drilling at depths down to 250 meters. In order to optimize production, this rugged and easily ...

The Explorac 100 has a simple and rugged design, which makes it reliable as well as easy to operate. The rig can work with air pressures up to 35 bars. Add as an option one of Atlas Copco's ...

Atlas copco explorac 100 reverse circulation drilling rig

Reverse circulation is gaining ground as a preferred technology to collect quality samples in initial exploration, ore body development and in-pit grade control ...

Description: Explorac 100 - Reverse circulation drilling rigs The Atlas Copco Explorac 100 is a crawler-mounted rig, designed specifically for reverse circulation drilling.

Atlas Copco Technical specification Compact and easy to move around The Atlas Copco Explorac 100 is a crawler-mounted rig, designed specifically for reverse circulation drilling. Its com- ...

Explorac 100 Reverse circulation drill rig for exploration drilling Hole diameter: 127-165 mm (5"-6.5") f Fast and accurate Reverse circulation (RC) drilling ...

In order to optimize production, this rugged and easily manoeuvrable rig comes with a rod handler and a positionable magazine that holds up to 30 drill pipes. Riffle, cone or rotary splitters are ...

All Atlas Copco products are engineered to integrate seamlessly, ensuring the highest level of reliability and energy efficiency. As a result, Atlas Copco can ...

To enhance ore grade control and achieve more efficient exploitation of mineral resources, Huatailong purchased an Atlas Copco Explorac 100 reverse circulation drill in ...

Fast and efficient Explorac 100 is a crawler-mounted, compact rig specifically designed for reverse circulation drilling at depths down to 250 meters. In order to optimize production, this rugged ...

PRZOOM - /newswire/ - Stockholm, Sweden, 2013/05/15 - Atlas Copco's new Explorac 100 is a reverse circulation drilling rig designed specifically for exploration drilling to depths of 100 200 ...

Our Explorac range provides exploration drillers with the only reverse circulation drilling rigs on the market which are specifically designed for reverse ...

ATLAS COPCO has launched the Explorac 220RC reverse circulation drill as a cost-effective rig with low operation and maintenance costs. It is the only surface exploration ...

SpeedROC D30: Down-the-hole drill rig Rock Buggy: Hydraulic top hammer drill rig SpeedROC 2F: Hydraulic top hammer drill rig Explorac 100: Reverse circulation drilling rig RD10+: RD10+ ...

Atlas Copco has launched a new reverse circulation drilling rig designed for exploration drilling to depths of 100-200 m and a lifting capacity of 10.5 t, named the Explorac ...

Reverse circulation drilling rigThe Explorac RC30 Smart has been designed from the ground up to be a robust

Atlas copco explorac 100 reverse circulation drilling rig

and dependable part of an exploration operation. This rig uses the Reverse ...
