

Automatic drill pipe addition for water well drilling rig

What is a drillmax ® drill pipe?

DRILLMAX ® drill pipes accommodate different applications performed by water well drillers across the country. Designed as part of the whole system -- drill rig and tooling -- there are primary drill pipe sizes and drill pipe weights for each specific DRILLMAX ® water well rig.

What is an automated drill rig?

An automated drill rig (ADR) is a top in league automated full-sized walking land-based drill rig that drills long lateral sections in horizontal wells for the oil and gas industry. They are agile rigs with the potential to move fast to new well sites.

Can drill pipes be used on any rig?

However, the drill pipes are engineered to be able to be used on any rig in the DRILLMAX ® line. Higher-grade material for the mid-body strengthens drill pipes for increased durability. Engineers also added a stress-relief groove where pin end meets body of drill pipes for additional durability.

What is drilltronics®?

DrillTronics® is a unique drilling automation and safeguarding system that can boost the safety and efficiency of drilling operations in all scenarios. Embedded in the rig's Drilling Control System, DrillTronics can control swab and surge effects, manage pump startup, conduct automated friction tests and reciprocation.

How does a stinger pipe handling system benefit a drill rig?

The offline stand building cuts the drill string running time and that affects the overall cost of operating the rig. The Stinger pipe handling system also reduces the need for personnel on the drill floor by directly handling heavy objects keeping the work environment safe and secure.

How does the new pipe handling system work?

Our new pipe handling system allows to build up and rack back stands of drill pipe, drill collars and casing offline, while drilling. The theoretical comparison with the conventional approach of handling pipes emphasizes how offline stand building leads to 20% efficiency gains on tripping time and zeroes accidents on the drill floor.

The present disclosure relates generally to drilling systems, and more particularly to an automated system for adding and removing drill pipe segments to modify the length of a drill...

LS200H Hydraulic Water Well Drill LS200H Hydraulic Water Well Drilling Rig The LS200H is excellent for drilling applications that require the added power and ...

Automatic drill pipe addition for water well drilling rig

This weight-to-weight connection time is typically used to measure the performance of an automated drilling process. In one case, a rig started to ...

Featuring the "OTTO" Automatic Drill Rod Loader OTTO is available on all of DeepRock's 10 foot rigs OTTO moves over to pick up a drill rod The OTTO ...

Leading the industry in rig automation, our control systems seamlessly integrate drilling equipment, improve performance, and boost drilling efficiency.

Portable water well drilling rigs for sale in Henan YG Machinery is a type of home water well drilling equipment, which can also be called folding water well ...

Truck mounted water well drilling rig is a self-contained drilling system mounted on a heavy-duty truck chassis. Unlike traditional stationary rigs, this configuration offers unparalleled mobility, ...
