

Banger maine drilling rigs accidents

How much money did the oil rig disaster cost a family?

Lawsuits raised by families of the lost totaled \$20 million. Offshore workers often get high salaries, and it's easy to see why. A career in the drilling of oil and gas comes with many risks, and when things go bad, oil rig disasters can bring heartache to dozens, if not hundreds of families.

How many people died in a rig accident?

Tragically, this accident led to the death of 72 of 76 workers onboard. While the rig was being towed between China and Korea, a storm with force 10 winds caused waves to crash over the main deck. These waves inflicted significant damage to the deck, causing flooding of the rig. This, alongside the relentless storm, capsized the rig.

What was the worst oil rig disaster ever?

Piper Alpha The North Sea disaster on Piper Alpha remains the worst oil rig disaster ever. The tragic event claimed the lives of 167 people on 6 July 1988. A communication error between shift changes resulted in a gas leakage which triggered multiple explosions on the platform. Of the 226 workers, only 61 survived.

Did a man die from an oil rig explosion & fire?

November 14, 2017 - A man was seriously hurt in an oil rig explosion & fire in White County, and later died from his injuries. In September, 1941, a nine-hour conflagration at the Whiting Standard of Indiana refinery killed one man and injured 20 others.

How dangerous is drilling for oil?

Drilling for oil is an incredibly dangerous undertaking, and when the death toll is as high as it is, it's hard to fathom the number of non-fatal injuries inflicted on offshore and onshore workers. We often hear just of the death tolls, without giving much thought to the countless men and women who received life-altering injuries.

What happened to Enbridge natural gas pipeline?

January 21, 2019 - A 30-inch diameter natural gas pipeline owned by Enbridge exploded in Noble County, Ohio at approximately 10:40 a.m.. The pipeline was built in the 1950s, and last inspected in the 1980s prior to the explosion. Still under investigation, corrosion is the presumed cause.
