

Beaver geotechnical drill rig

What is a Big Beaver drill?

The Big Beaver is the most powerful earth drill produced by Little Beaver, the leading manufacturer of torque-free, one-man earth drills. Ideally suited for drilling environmental test wells, soil sampling and foundation repair, the Big Beaver offers one-man operation and portability in areas inaccessible to truck-mounted units.

Who is Beaver drilling?

Beaver is one of Canada's signature oil and gas drilling contractors, having been in successful operation since 1965. We combine our many decades of experience with performance drilling technology to meet the rigorous demands of today's drilling markets. Reliable equipment, experience... Black Gold Drilling from Nampa, AB.

What size Auger do I need for a Big Beaver?

The Big Beaver is designed to work with 4"-18" D-series augers. When deep holes are required, auger extensions can be added to let you drill down to 30' with a 16" auger and up to 100' with a 6" auger, depending on soil conditions. The Big Beaver excels at foundation repair, efficiently drilling pier holes up to 16" in diameter.

What is a Big Beaver used for?

Ideally suited for drilling environmental test wells, soil sampling and foundation repair, the Big Beaver offers one-man operation and portability in areas inaccessible to truck-mounted units. The Big Beaver is designed to work with 4"-18" D-series augers.

Can the track Beaver be used as an auger?

In areas of lower clearance, the unit can be used with a custom built short tower (min. 8') or as an auger (min. 7') in conjunction with another one of our drills for soil sampling. The Track Beaver needs a little more space to manoeuvre it. Power: Standard 140 lb hammer; blow counts suitable for SPTs.

What is the best one-man earth drilling machine?

Little Beaver has been designing and building some of the best, safest and easiest to operate one-man earth drilling machines for more than 50 years. Lone Star's Drills are available in sixteen models and used in a variety of applications including water well drilling, soil sampling, geotechnical testing and auger drilling.

The GEO line includes a wide range of models installed on (steel or rubber) crawler tracks, ranging from lightweight and small footprint units ideally suited for small geotechnical site ...

The new Lone Star truck-mounted LS T1 geotechnical drill rig is designed to allow faster and easier transportation from site to site, offering ...

Beaver geotechnical drill rig

Ideally suited for drilling environmental test wells, soil sampling and foundation repair, the Big Beaver offers one-man operation and portability in areas ...

Soil Sampling Accessories SSK-1 Cathead Kit The SSK-1 includes a third hydraulic valve, tower kit and spool. It can be used with Little Beaver's AWJ ...

Little Beaver, a manufacturer of safe and productive drilling equipment, recently introduced the new Lone Star LST1 heavy-duty geotechnical drill rig. The LST1G+HD drills to ...

The new model offers enhanced power and capabilities when compared to Little Beaver's smaller LST1G+ geotechnical drill. Little Beaver added a planetary reduction gearbox ...

The Beaver Rig is made for inside drilling programs. Up and down stairs, embankments, hallways, buildings and garages - this unit has been everywhere a limited access drilling unit can go.
