

Bp atlantis drilling rig

Will MMS investigate BP's Atlantis PQ drilling rig?

The Deepwater Horizon drilling rig explosion has given new impetus to a number of Congressional Representatives to pressure the Minerals Management Service (MMS) to investigate safety practices on BP's Atlantis PQ offshore platform in the Atlantis Oil Field.

When did Atlantis start producing oil?

Atlantis produced its first oil in October 2007, with full commissioning and a ramp-up in production in December that year. Phase three expansion of the Atlantis field increased the platform's production from August 2020. Credit: BP. The Atlantis oil and gas production platform is the deepest moored oil and gas facility in the world. Credit: BP.

Where is the Atlantis Oil and gas field located?

Operated by BP, the Atlantis conventional oil and gas field is located off the coast of Louisiana in the south-eastern Green Canyon protraction area. All images provided courtesy of BP.

Does BP own Atlantis Oil?

The subsea structure of Atlantis has long been the target of safety critics. The Atlantis oil field has estimated ultimate reserves of about 600 million barrels (95 × 106 m³). The supermajor BP owns a 56% interest in the field in conjunction with Woodside Energy which owns a 44% interest.

How deep is the Atlantis Oil Field?

The oil field lies in water depths ranging from 4,400 to 7,100 feet (1,300 to 2,200 m). The subsea structure of Atlantis has long been the target of safety critics. The Atlantis oil field has estimated ultimate reserves of about 600 million barrels (95 × 106 m³).

Why is BP investing in oil & gas?

Energy demand continues to grow, and we are increasing our investments in oil and gas. The Atlantis platform is bp's deepest moored floating platform in the Gulf. That's 5x the height of Empire State Building, maintaining strong and safe operations. Atlantis allows bp to access and deliver barrels that provide the energy the world needs. weeks.

Overview Safety practices Reserves History Production External links On 17 May 2010, consumer group Food & Water Watch, with former BP contractor Kenneth Abbott, filed a complaint in the United States district court, seeking to stop production on the platform Atlantis PQ until safety documents are produced. The suit was dropped by the plaintiff and re-file naming BP as a defendant, as required once BP became involved. According to Food & Water Watch, BP failed to supplement its document production with new in...
