

Bronze anchor clamp drilling rig

Why should you use a bronze wireline clamp insert?

Durable bronze wireline clamp inserts provide tight cable grip without damage to the line. Easy to install and service. Matherne Instrumentation's deadline anchor's are specifically designed to meet your requirements for any and all working environments.

What is a deadline anchor on an oil rig?

A deadline anchor on an oil rig is a critical component used to secure the dead line, which is the non-moving end of the drilling line in a drilling rig system.

What is a wireline clamp?

They are fabricated from high-grade structural steel and welded. Aluminum bronze wireline clamp inserts provide a secure cable grip without line damage. Each anchor is proof-tested twice to 150% of rated capacity, using the largest cable size for which it was designed (One proof test simulating normal operation with load cell installed).

What are the different types of deadline anchors?

Standard deadline anchors of different sizes and capacities as left-hand and right-hand design. Custom-made deadline anchors are also available. o 60 000-100 000 pounds deadline pull high-grade structural steel for operation in harsh work environments from -40°F to +55°F. its high-quality manufacturing standard and in accordance with API 8C.

What types of anchors are available?

Models available in a variety of sizes -- from lightweight models for mounting on wheel-mounted rigs and on helicopter rigs -- to models designed for 2-million-pound drilling masts. Super Grip (SG) Series Anchors tightly grip plastic-filled wire rope -- as well as accommodating standard wire rope. Center-point mounted drums ensure optimum accuracy.

How do anchor drums work?

Anchor drums are mounted on heat-treated alloy steel shaft, and pivot on high-quality tapered, anti-friction roller bearings. Drum surface is smooth or machine-grooved for precision line spacing. Drums are center-point mounted for optimum weight indicator accuracy without correction factor, regardless of radial line pull-off angle.

CROWN's TITAN deadline anchors are the most durable drill line anchor on the market. How do we know? After researching other deadline anchors, we, at Crown, soon ...

Matherne Instrumentation's deadline anchor's are specifically designed to meet your requirements - for any and all working environments. ...

Bronze anchor clamp drilling rig

Explore the working principles and anchoring methods of self-drilling hollow anchor rods in slope, foundation pit, tunnel, and prestressed support applications. Enhance project ...

The reliability of a deadline anchor is important to the overall drilling rig operational safety. The deadline anchor complies with all relevant standards, reduces wear on the deadline and ...

The Foundation Pit Support Anchor Engineering Drilling Rig is crucial for ensuring the stability and safety of construction projects. By securely anchoring ...

Benefits Heavy-duty, high-grade structural steel Tapered roller anti-friction bearings Bronze wireline clamp Machined grooved drum Left-hand models available Deadline anchor ...

Anchor Drilling Rigs: The Backbone of Geotechnical and Civil Engineering Anchor drilling rigs, also known as anchoring drilling rigs or anchoring engineering drilling rigs, are ...

Models available in a variety of sizes -- from lightweight models for mounting on wheel- mounted rigs and on helicopter rigs -- to models designed for 2-million ...

TITAN anchors offer unmatched reliability, durability, and cost savings versus the competition. Our anchors are also engineered for safety - every TITAN anchor ...

Type Anchoring drilling mast for excavator Dimension (L*W*H) 6008*380*215mm Torque 15000N.m Hydraulic winch 1T Colour As customer need Weight 2800kg Brand Name ...

MA60D Deadline Anchor Matherne Instrumentation's deadline anchor's are specifically designed to meet your requirements - for any and all working environments. They are fabricated from ...

American Block offers a full line of high-quality deadline anchors with pull capacities ranging from 30,000 to 150,000 pounds. Their anchors are ...

All Hercules Deadline Anchors are fabricated from high-grade structural steel and welded to meet all regulatory requirements for working in any sort of environment.

Offering a variety of models from models for mounting on wheel mounted rigs or helicopter rigs and models designed for drilling masts of up to 2 million pounds Super Grip (SG) Series ...

The deadline anchor is used to tie down the drill line and measure the load suspended from the top drive (i.e., hook load). The wire drum attached to the ...

MA60D Deadline Anchor with Load Cell ensures superior reliability. o Durable bronze wireline clamp inserts

Bronze anchor clamp drilling rig

provide anchor tight cable grip without damage to the line. Matherne ...

Designed to be used with compression load cells, the Bentec Deadline Anchors are made from high-grade structural steel for operation in harsh work ...

Drilling Rig Spare Parts - Deadline Anchors Features TYPE: JZ Series Our manufactures a Full line of all-weather, quality-built, full range of deadline ...

American Block offers a full line of high-quality deadline anchors with pull capacities ranging from 30,000 to 150,000 pounds. Their anchors are constructed with top-quality steel, proof-tested to ...

We offer a wide line of standard traditional oilfield anchor models as well as rotating-drum alternatives that reduce wire rope reeving time. And as with all ...

Dicks Oilfield Instruments" Deflection type weight indicator is ideal for use with small to medium drilling and workover rigs. Unit is portable, rugged, and ...

Center point mounted for optimum weight indicator accuracy without correction factor, regardless of radial line pull off angle. Aluminum bronze wire line clamp inserts provide ...

MA40FS Deadline Anchor Matherne Instrumentation"s deadline anchor"s are specifically designed to meet your requirements - for any and all working ...
