

C5 drill rig

What is a Boyles c5/c5c surface core drilling rig?

The Boyles C5/C5C surface core drilling rig is compact, yet powerful. Its compact design makes it easy to position and transport, even by helicopter. During helicopter transport, the rig is broken down into six main modules and each module is equipped with lifting points to ensure safe and effective transport.

How deep can the Boyles c5/c5c drill?

Robustly designed down to the smallest component, the Boyles C5/C5C has a drilling depth capacity of 1 044 meters N-size making it suitable for drilling at large depths in remote locations. The rig is easy to operate using an intuitive control panel. All drilling functions can be operated from the control panel.

What is a Boyles c5/c5c?

The Boyles C5/C5C is synonymous with productive drilling, maximum uptime and low maintenance requirements. The powerful main hoist, equipped with a hydraulic motor and a dual brake system, ensures well-controlled feed. The dual brake system offers both dynamic and static breaking.
