

## Caltrans drilling services drill rig sel

Which documents are used in all products produced by Caltrans?

The terminology, definitions, and formatting of soil and rock descriptions presented in these documents are used in all products (i.e., reports, correspondence, figures) produced by or for Caltrans. Attention Consultants: Rules and information regarding document updates and implementation are provided in this Message to our Consultant Partners.

Are Caltrans documents accessible?

Accessibility Assistance: Caltrans makes every attempt to ensure our documents are accessible. Due to variances between assistive technologies, there may be portions of this document which are not accessible. Where documents cannot be made accessible, we are committed to providing alternative access to the content.

What are the requirements for a Caltrans tunnel?

Pits must be lined with filter fabric when groundwater is found and pumping is required. Temporary Type-K railing must be placed at a 10:1 taper or as otherwise directed by the Caltrans' representative to maintain the integrity of the adjacent travel lane. Any installation that is 30 inches in diameter or greater is defined as tunnel.

Can a Caltrans encasement end be plugged with ungrouted bricks?

Encasement ends shall be plugged with ungrouted bricks or other suitable material approved by the Caltrans' representative. The Caltrans' representative may require the permittee to pressure grout, filling any voids generated during the permitted work. Grouting shall be at the expense of the permittee.
