

Jack-up rigs drill through slots in their hull, or have the ability to extend ("cantilever") the drilling package out over the side of the hull. A cantilevered ...

Drill floor/cantilever, configured for off-line stand building with Iron Roughnecks. Living Quarters for 150-plus, with up to 11 office/conference/training rooms; configured to suit client needs.

This invention relates to the design of an apparatus and a method called Buddy Cantilever System for increasing the carrying capacity at extended positions of ...

GMS Evolution Well Intervention with Cantilever GMS Evolution and the Cantilever workover system has been designed and built to enable heavier workover operations from this self ...

Cantilever is the most important structure of the jack-up rig. Jack-up usually has three working conditions: drilling condition, storm condition, preloading ...

Cantilever is located on the main deck; drilling pipe rack and the guide rail for drill floor foundation transverse moving are arranged. Drill floor substructure is installed on the transverse guide ...

Bottom jets Top jets Cantilever or slot Skid-off Cantilever envelope: Reach aft, from/to Transverse, port/stbd Max cantilever load: (Combined hook+rotary+setback) Max rotary load Max setback ...

The CJ50 is a three-legged cantilever type jack-up drilling rig that is part of the well-established GustoMSC CJ series. The series consists of seven distinct types for moderate and ...

Petrovietnam Drilling & Well Service Corporation (PV Drilling) is investing in a three-legged multi-purpose jack-up rig with cantilever and is expected to put the rig into ...

Rack-and-pinion skidding systems are used for moving the cantilever and the drill floor of a jackup rig to locate the well center at correct position. Our BLM ...

Perisai's first Jack-Up Drilling Rig is a PPL Pacific Class® 400 with technologically advanced drilling capabilities. The Rig is designed and equipped to drill high pressure and high ...

This type of rig is commonly used in connection with oil and/or natural gas drilling. There are more jackup rigs in the worldwide offshore rig fleet than other type of mobile offshore drilling rig. ...

Description of glossary term A rig cantilever refers to the extendable drilling platform on a jack-up rig that

Cantilever jack up drilling rig

allows the drilling equipment to be positioned over a well without moving the entire rig. ...

The drillfloor and cantilever are the most key parts of jack-up drilling rig. Their designs directly affect capability of a jack-up drilling rig. There are 3 most used cantilevers in ...

TASHA Super premium self-elevating cantilever drilling rig independent legs (jack up) - 15,000 Psi Blow Out Preventer System - 3 ea. 7,500 Psi WP Mud Pumps - 3,000 HP Drawworks

The extending of a cantilever and transverse moving of a drilling floor enable the jack-up to operate in several well positions after the Jack-up has pitched. The cantilever ...

The skidding system refers to cantilever and drill floor skidding systems. The purpose of the cantilever and drill floor skidding systems is to perform both l...

Technical specifications The Herrenknecht Vertical jack-up rig, a highly-automated cantilever rig package for offshore drilling and workover on jack-up platforms. The rig is equipped with a ...

HAKURYU-14 HAKURYU-14 is a 400 ft operating water depth self-elevating cantilever jack-up drilling rig, built by PPL Shipyard Pte. Ltd. using the Baker Marine Design and was delivered in ...

Jack-up rigs are used to drill wells in shallow waters, typically less than 400 ft of water, and can be used to drill wells to a Total Depth (TD) of 30,000-35,000 ft. ...

The CJ70 is a three-legged cantilever type jack-up drilling rig that is part of the well-established GustoMSC CJ series. The series consists of seven distinct types for moderate and harsh ...

The purpose of the cantilever and drill floor skidding systems is to perform both longitudinal and transverse movements of the complete cantilever/drill floor assembly relative to the main...

A Jack Up Rig is the most high-class asset in offshore oil drilling, with its utilisation rates ranging between 92% and 97% across southeast Asia, ...

4 days ago; NEW 300FT OFFSHORE JACK-UP RIG This platform is a non-self-propelled self-elevating drilling rig used for offshore oil and natural gas ...

A jack-up rig is a floating drilling rig with (typically) three retractable legs which can be raised while the rig is moved onto location (either self-propelled or ...

Cantilever jack up drilling rig
