

Conoco drilling rigs jackson louisiana

What are offshore drilling companies in Louisiana?

Offshore drilling companies in Louisiana contribute significantly to the energy sector, offering specialized services in oil and gas extraction. Deploying advanced equipment and experienced personnel, they concentrate on seabed exploration and drilling operations, making Louisiana a major hub for these activities.

How many wells does ConocoPhillips drill?

The company operates over 2,800 producing wells across Midland, Upton, Andrews, Martin and Glasscock counties. ConocoPhillips began horizontal development drilling in 2013, primarily through single-well pads in the Wolfcamp B formation.

When did ConocoPhillips start drilling?

ConocoPhillips began horizontal development drilling in 2013, primarily through single-well pads in the Wolfcamp B formation. The company is utilizing technologies such as time-lapse geochemistry, image logs and pressure monitoring to further optimize well spacing, stacking and completions design in these producing zones.

How many rigs were drilled in 2024?

Current development activity targets prospects in the Avalon, Bone Springs and Wolfcamp formations while balancing leasehold obligations and permit terms. We operated 10 rigs and two frac crews on average during 2024, resulting in 166 operated wells drilled and 151 operated wells brought online.

Is ConocoPhillips a liquids-rich oil company?

The liquids-rich Eagle Ford tight oil trend, located in the Western Gulf Coast Basin of south Texas, represents the company's second-most prolific unconventional resource development. ConocoPhillips was one of the first companies into the liquids play, resulting in a low-cost entry into this acreage.

How many rigs are in the Williston Basin?

We hold approximately 790,000 unconventional net acres in the Williston Basin, located in North Dakota and eastern Montana. The primary producing zones are the Middle Bakken and Three Forks formations. We operated four rigs and one frac crew on average during 2024, resulting in 66 operated wells drilled and 83 operated wells brought online.
