How does a core drilling rig work?

Depending on the size of the hole, most situations require the drilling rig to be attached to the ground or surface with an anchor, bolt, or vacuum seal to keep the rig stabilized. Because core drilling requires substantial speed and force to get through concrete, a lot of heat is generated during the drilling process.

What do you learn in a Core Drill Course?

You'll learn about core bits, reaming shells, core barrels, inner tubes, drill rods, casing, how they all fit together and what their purpose is. The video does an excellent job of describing how core drilling works visually, with clear animation.

What is core drilling?

Core drilling refers to the system of drilling and collecting a cylindrical core sample in its original state, in-situ. This process is typically carried out using a 'wireline coring' method, which involves the use of a diamond impregnated (hollow) core bit that cuts until the core barrel is full.

What types of drilling rigs are available?

The drilling videos featured here on our website showcase the capabilities of various types of drilling rigs, including water well drilling, auger drilling, core drilling, and more.

Where is core drilling located?

Core has two dispatch locations in Alberta including Grande Prairie and Calgary. Core Drilling is set up at the Canadian Land Reclamation Association conference at the Edmonton Convention Centre March 6-7! Come and say hello if you are attending. #CLRA2025

Why are a driller available to share their expertise?

They are available to share their expertise because our goal is to make drillers' lives easier and to improve drilling performance, one drill site at a time. The next in our series of videos about the diamond drilling industry is all about the components of core drilling.

This video shows core drilling rig in action at rugged outdoor site. Drill rod rotates with steady force, boring deep into earth while muddy slurry of water and rock fragments gushes out around base.

8-inch Wet & Dry Diamond Core Drilling Machine: Our standup core drilling machine with stand can perform wet and dry two modes drilling, ...

The DBE 201 is industry's most powerful, compact, and lightweight core drill rig. At 34 lbs., this diamond core drill rig's lightweight and streamlined design makes it extremely portable and ...
