Moreover, our GEO rigs can be configured for Sonic drilling for ground investigations in challenging ground conditions. Typically, our geotechnical site investigation equipment is used to:

What is a rotary drill rig used for?

The larger units in the range can also be used to perform rotary drilling (with either direct or reverse mud circulation) and DTH drilling for water well construction projects and ground source heat pump systems (geothermal drilling).

What is a crawler drill?

Our crawler drills are engineered to provide unmatched versatility, enabling efficient performance across various drilling applications, including anchoring, micro-piling, and jet grouting. Equipped with modular systems and adaptable configurations, these machines can be tailored to meet specific project requirements.

Do you need a crawler for a drilling rig?

You will need to choose a crawler if it needs to move at a low speed over unlevel areas or on very loose ground. The stability of the drilling rig depends on the surface area of the tracks. As such, the wider the tracks, the more stable the drilling rig will be.
