

Deepest water for jack up drilling rig

Fleet Detail To drill down for more detail on dimensions, capacity, subsea equipment and much more, please explore the specs for each and every rig in ...

Depending on the rig type, offshore rigs are rated to drill in water depths as shallow as 80 ft to as great as 12,000 ft. The greatest water depth a jack-up can drill in is 550 ...

Offshore drilling plays a critical role in the global energy industry, providing access to vast underwater oil and gas reserves. One of the most widely used platforms in shallow ...

Depending on the water depth and remoteness of the location, these "rigs" may be jack-ups (up to 400 feet of water), or semisubmersibles, or drillships (up to ...

The self-elevating jack-up rig was first constructed in 1954 and quickly became one of the most famous designs in transportable offshore drilling equipment. Jack-ups were common for drilling ...

Test Your Knowledge Jack-Up Rig Quiz Instructions: Choose the best answer for each question. 1. What is a Jack-Up Rig primarily used for? a) Transportation of oil and gas b) Underwater ...

CIMC Raffles delivered China's first drilling rig "Shengli 1" in 1978. Since October 2010 till now, CIMC Raffles has delivered 12 semi-submersible drilling rigs and 15 Jack up drilling rigs, ...

Jack-Up Rig - Jack-up rigs are mobile units with a floating hull that can be moved around; once they arrived at the desired location, the legs are lowered to the seafloor and locked into place.

Jack-Up Drilling Rig Model: TAY-JU Series | Date: August 20th, 2025 TAYMA Jack-Up Drilling Rigs are engineered for high-performance offshore drilling in shallow to mid-water depths, ...

VALARIS 120 Design: KFELS Super A Class Water Depth: Jackup: 351" + Region: Europe and Mediterranean Special Capabilities: Heavy Duty Ultra-Premium Harsh, High Specification, ...

Gulf Driller VIII (JU2000E Design) Jack-up Drilling Rig is designed by an American design company-F& G. It is able to operate at water depth up to 120m (400ft) and drill wells down to ...

In this paper, an investigation into extending the length of the jack up leg is carried out in order to study the enhancement of the rig capability to drill in deeper water approaching ...

Jack-Up Drilling Rig Model: TAY-JU Series | Date: August 20th, 2025 TAYMA Jack-Up Drilling Rigs are

Deepest water for jack up drilling rig

engineered for high-performance offshore drilling in shallow to mid ...

The jack-up, or self-elevating, rig was first built in 1954 and rapidly became one of the most popular designs in mobile offshore drilling units. Jack-ups were popular for drilling activities in ...

4 days ago; CP-300 is a non-self-propelled self-elevating drilling unit, used for offshore oil and natural gas exploitation and development operation, with the max. operating water depth ...

Jacked-up rigs are floating drilling rigs with three or four movable legs which can elevate when the rig relocates from one location to another. Jack-up rigs are commonly used ...

Borr Drilling focuses on providing high-quality drilling services with a fleet of modern jack-up rigs. The company is known for its innovative ...

Table 1 indicates that both the leg structure dimensions of jack-up rigs and environmental conditions tend to increase in deeper water. In the ...

5 days ago; Jackup Rig 300 foot WD 300FT OFFSHORE JACK-UP RIG This platform is a non-self-propelled self-elevating drilling rig used for offshore oil and natural gas exploitation and ...

Aissa Atlantic provides jack-up rigs that can drill in waters up to 350 feet deep. The jack-up rigs can be maneuvered either by self-propulsion or by towing into any location.

A North Sea operator was conducting pre-drilling operations in 134m water depth in the Norwegian North Sea using a jack-up drilling rig. High predicted vessel ...

Jacked-up rigs are floating drilling rigs with three or four movable legs which can elevate when the rig relocates from one location to another. ...

A jack-up rig is a floating drilling rig with (typically) three retractable legs which can be raised while the rig is moved onto location (either self-propelled or ...

Depending on the rig type, offshore rigs are rated to drill in water depths as shallow as 80 feet to as great as 12,000 feet. The greatest water depth a jackup can drill in is 550 feet, and many ...

We are constantly high-grading our fleet to ensure that our rigs are equipped to handle even the most challenging projects. It's that dedication to performance and innovation that keeps our ...

Abstract. East Kalimantan and Attaka is a mature oil and gas blocks located in offshore East Kalimantan, Indonesia covering vast geographical area with vary water depth ranging from 14 ...

Deepest water for jack up drilling rig
