Who owns the Sedco 706 drilling rig?

The Sedco 706 drilling rig is owned by Transocean Inc. which can be contacted for jobs and careers on the Sedco 706. The Semisub is a Semisub type of rig and is designed as a Earl & Wright/Sedco 700 Series and built by Kaiser Steel at the Kaiser, San Francisco, CA shipyard.

Who built the Sedco rig?

Two of the drilling platforms, the Sedco Express and the Sedco Energy, were built by DCN in France. PPL Shipyard in Singapore built the third rig, the Cajun Express.

How many rigs does Transocean Sedco have?

Transocean Sedco Forex Inc operates three large, self-propelled, semi-submersible drilling rigs that are each equipped with four 7 MW (9,390 hp) electrically driven Mermaid Pod propulsion units, two on each pontoon. Two of the drilling platforms, the Sedco Express and the Sedco Energy, were built by DCN in France.

Why did Transocean upgrade its Sedco 700 rigs?

FROM THE FULL PICTURE MAGAZINE -- To meet market demands for deepwater drilling, Transocean chose to upgrade two of its Sedco 700 series drilling rigs to dynamically positioned class 2 semi-submersible rigs. The process was so comprehensive the rigs were classified as newbuilds.

How does the Sedco 706 semisubmersible rig work?

In order to achieve this, the Sedco 706 semisubmersible rig relies heavily on its Dynamic Positioning (DP) system for automatic station keeping; it previously relied on anchors. As a result of the upgrade, Sedco 706 now features a DP class 2 system provided by Kongsberg Maritime.

When did Transocean start jack-up drilling rigs?

The company launched its first jack-up drilling rig in 1954. Since then, Transocean has had a long history of 'firsts': among them, the latest generation of ultra-deepwater semi-submersible rigs and drillships, of which the upgraded Sedco 700 rigs make up an important part.
