

Double rotary head drilling rig

Double head system The GEO 900 GT version was designed to meet the needs of customers working in the field of geothermal engineering who wish to utilize ...

Stronger pull-up capacity of the rig from 10 to 12 ton, that increases the unit's performances. FRASTE MULTIDRILL XL DR drilling rig is equipped with two ...

2 with double head unit (rotary / rotary) Depending on the intended purpose of the borehole, for instance, to support a bored diaphragm wall, or a subterranean curtain wall, a cased drilling ...

All KLEMM rotary heads are designed so that they are perfectly matched to the respective drilling system and drilling task. This means that the drives produce the maximum drilling ...

The distinguishing feature of the dual-rotary (DR) drill rig is a lower rotary drive, which is used to independently advance casing up to 40 inches, depending on the drill model.

Double head Rotary-Rotary systems are a preferred method for drilling straight, deep holes. These systems offer the driller a high level of flexibility and control to deal with varying ground ...

Drill rig INTEROC, model AN140 Double rotary head with drifter Multipurpose rig for anchoring drilling, micropiles, etc. Rig has strong drill heads with drifter on top head A very ...

The LB 30 is the successor of the proven rotary drilling rig LB 24-270. Its torque is 297 kNm - a 10 % increase in comparison to its predecessor. Drilling with Kelly equipment, double rotary ...

In 1979, Barber Industries, in conjunction with Wendell Reich, conceptualized and built a rig that simultaneously could drill a hole and set casing under the most difficult of drilling ...

Double head system The GEO 602 GT version was designed to meet the needs of customers working in the field of geothermal engineering who wish to utilize ...

The rapid spread of ground source heating systems over the past years has led to an increased use of Comacchio rigs for geothermal drilling applications utilizing dual head drilling systems. ...

Secant piled walls are formed by interlocking reinforced concrete rotary bored piles. The piles are reinforced with either steel rebar or with steel beams and are constructed by either drilling ...

Our RDS heads go through the same bench testing procedure prior to delivery as our patented hydraulic

Double rotary head drilling rig

drifters. TEI is a preferred replacement rotary drill head ...

EURODRILL rotary heads for pile rigs are designed for high power consumption and a long durability. These rotary heads operate for many years in different ...

Double rotary drilling combines continuous flight auger drilling with a continuous casing. Casing and auger (inside the casing) are simultaneously installed and ...

The combined piling and drilling rig LRB 355.1 can be used for a great number of different applications including drilling with Kelly equipment, double rotary ...

Double rotary head drilling rig
