

Drill rig carousel

What is a drill pipe carousel?

A drill pipe carousel comprises a circular pipe rack mounted for rotation about a vertical axis in a drilling mast, a rotational drive train and a push-pull mechanism for moving the rack to and from the drill string. The rack includes upper and lower support plates mounted on a hollow central support tube.

How does the Comacchio carousel work?

The machine is completely remote controlled, thanks to the unique Comacchio radio control system, which allows you to manage not only the tramming, drilling and machine set-up functions, but also to operate the hydraulic rod & casing carousel. The carousel is suitable for different rod and casing dimensions up to a maximum of 8 rods and 7 casings.

How many rods and casings can a carousel hold?

The carousel is suitable for different rod and casing dimensions up to a maximum of 8 rods and 7 casings. The MC 22A is used mainly for anchor drilling and consolidations in general.

What is a dm250 rod carousel?

You've reached the new home of DM series rigs engineered specifically for water well and geothermal contractors. DM250 rod carousel carries 160-feet of 3-inch drill pipe for a simple, easy way to go in and out of the hole; grooves along carousel provide visual indicator when aligning rotary head over rods.

What is the MC 22A drill rig?

The MC 22A is the new MC 22 drill rig version featuring the innovative hydraulic rod & casing carousel. The machine is completely remote controlled, thanks to the unique Comacchio radio control system, which allows you to manage not only the tramming, drilling and machine set-up functions, but also to operate the hydraulic rod & casing carousel.

What is a versa-drill carousel & back loading system?

VERSA-DRILL's innovative carousel and back loading system, equipped with a wire pendant and clam shell, streamlines rod handling by offering a more user-friendly approach. The carousel provides a continuous, organized supply of rods, allowing for quicker loading and unloading.
