What is a cwt drill?

It's a non-coring toolsuitable for N- and B-size holes,without any depth limitation (>2500 m). The CWT is a robust and reliable tool that is driven by the rotation and feed of the drill rods and it doesn't depend on water pressure or water flow in order to operate.

What is a cwt tool?

The CWT system developed by BG Drilling Solutions is the perfect tool for obtaining desired results with short wedge-like deviations. It's a non-coring toolsuitable for N- and B-size holes,without any depth limitation (>2500 m).

What is the continuous coring tool (CCT)?

Building on the success of the CWT, BG Drilling Solutions is thrilled to present the Continuous Coring Tool (CCT) - the world's first mechanically driven directional core drilling (DCD) system and, by operational principle, the second. The Continuous Coring Tool is a drilling system designed to obtain core continuously while steering the hole.

How is the cwt equipment packed?

The CWT equipment is packed in 4 boxes of 70 kg each. The CWT is always operated by our trained operators,who are drilling engineers. The CWT is a non-coring technology and executes short deviations with a short section of coring with the regular core barrel in-between.

What is directional drilling?

Directional drilling is a technique that forcefully changes the position of the borehole. It uses special tools that helps the hole stay on track and within the planned trajectory.

How many cwt facilities accept oil & gas extraction waste?

According to the EPA's CWT facility list,187 facilities accept oil and gas extraction wastes. However,these facilities are not in-scope of the current study. Additionally,12 facilities only accept CBM wastesand are also not in-scope of the current study.
