

Drilling depth of air-leg rock drill

YT28 air leg rock drill is mainly used for blasting holes and other drilling works in a quarries, railway construction, water conservancy construction and defence project facility. Further, it is ...

There are many things to consider when choosing a pneumatic rock drill, as drills come in several weight classes and sizes. The smallest pneumatic hand drill weighs in around 8 pounds while ...

Drilling Depth : 7.2 - 8m Unlike conventional jack legs designed primarily for maximum drilling speed, FACE WARRIOR 280LD Jack Leg Rock Drill under Japan standard for underground

The YT28 air leg rock drill is most suitable for dry drilling downward and inclined blast holes in medium hard and hard rock with a hardness of F8-18. An ideal ...

Our pusher legs and stoper rock drills cover all construction, tunnelling and mining applications in different rock formations. They are robust designed, with high impact energy and low air ...

The Rukton Minerals YT27 air leg rock drill (Jack Hammer) stands out as a cutting-edge tool in the realm of rock drilling machinery, owing to its remarkable high-speed performance. Tailored ...

Introduction to yt24 air leg rock drill machine 1. YT24 is suitable for drilling horizontal or tilted blasthole in solid hard rocks as well as vertical bolt holes ...

The YT29A rock drill is the most rugged, powerful and highly efficient rock drill in the range. It provides improved productivity and drill steel economy and can ...

YT29A is suitable for working with the hard and solid rock to do the drilling level, inclined hole or the up drilling (The drilling diameter is commonly between ...

The BD-YT29A Air Leg Rock Drill is suitable for horizontal drilling or sloping blast hole in solid hard rock as well as vertical bolt holes in the roof. Diameter of ...

Discover the essential air pressure and CFM requirements for pneumatic rock drills, their impact on efficiency, and strategies for improving drill performance. Learn how to match ...

Y24 Hand-Held rock drill The YT24 leg-type rock drill is a highly efficient pneumatic rock drilling equipment widely used in mining, railway, transportation, and water conservancy construction ...

It has an air - leg support which provides stability during the drilling process. This allows the operator to

Drilling depth of air-leg rock drill

position and control the drill more accurately. The drill bit of the air - leg rock drill ...

When drilling, it is necessary to first operate without load. The driver stands on the side behind the pneumatic drill, holding the handle of the drill with one hand. Then adjust the ...

It is suitable for drilling flat or inclined horizontal or inclined blastholes on medium-hard or hard ($f=8\sim 18$) rocks, and the drilling depth can reach 5 meters. The machine adopts a ...

YT24 air-leg rock drill is a high-efficiency rock drill machinery. It is widely applied to rock drivage and drilling of blast hole in various rock drill operations and is ...

YT29A air-leg rock drill is suitable for drilling horizontal and inclined blastholes on medium-hard or hard ($f=8-18$) rocks, which can also drill bolt ...

The YT27 air leg pneumatic rock drill is designed for rock drilling in large mines and roadway projects, featuring a strong blowing function, high torque, and various operational mechanisms ...

YT28 Air-leg Rock Drill most fit for drilling horizontal and inclined blast holes in medium-hard and hard rock with a hardness of $f=8\sim 18$. It may also be used with for making roof-bolting holes. ...

Stoper YSP45 The Secoroc stopper rock drill, YSP45, is of robust design for tough working condition has high impact frequency and is mainly used for production drilling, raise driving ...

YT24 Air Leg Rock Drill Maxdrill's YT24 air leg rock drills are particularly designed for hole blasting in small or medium-sized mines and wet drilling horizontally or at a tilting angle. The ...

The YT28 air leg rock drill is most suitable for dry drilling downward and inclined blast holes in medium hard and hard rock with a hardness of $F8-18$. An ideal tool for rock drill operations in ...

Application: YT24 Air-leg Rock drills is an ideal tools for drilling blast-holes operations small and medium-sized quarries, mines. Combined with B22 drill rod and drill bit, select drill bits based ...

The YT27 air-legged rock drill is a highly efficient lightweight rock drill suitable for downward or inclined drilling in medium-hard or hard ($f=8 - 18$) rock with a ...

YT28 Air Leg Rock Drills The YT28 air leg rock drills is used to drill horizontal and inclined blast holes in medium-hard rock with a hardness of $f=8\sim 18$. It may also be for making roof bolting ...
