

Drilling rig 351

What is a pit viper 351 drill rig?

The Pit Viper name has become synonymous with productivity in the mining industry, and the Pit Viper 351 drill rig is the Pit Viper that started it all. When it comes to drilling large holes in hard rock, you can't compromise anywhere.

What is the pit viper series 351 blasthole drill?

The Pit Viper Series 351 blasthole drill opens the door to new applications and technological solutions. Using either vertical or angle single pass drilling, it can drill a hole as big as 16" (406 mm) in diameter and down to depths of 65 ft (19.8m). The PV-351 currently operates in more than 10 countries.

What is a pv-351 rig?

The Pit Viper name has become synonymous with productivity in the mining industry and the PV-351 is the Pit Viper that started it all. With a standard Rig Control System (RCS) operating platform, today's PV-351 sets the bar for productivity and reliability when large blastholes are part of the production plan.

How deep can a pit viper 351 drill?

The Pit Viper 351 can drill an angled or vertical a depth of 135 ft (41.1 m) in multi-pass applications. Single-pass more time for drilling. Eliminating rod changes also reduces the risk for operational errors. eliminates drill downtime for cable tensioning. This design allows system. powerful system to quickly drill through hard rock.

How deep can a pv-351 drill be used?

It can be used for single pass drilling of angled or vertical holes down to a depth of 65 ft (19.8 m), and for drilling of blastholes up to 16 in. (406 mm) in diameter. Since the introduction at MINE expo 2000, the PV-351 is the solution to your mining needs for superior productivity.

What is the pit viper 351 teleremote primary drilling project?

Implementing new technology to improve safety and working conditions is the main goal of the Pit Viper 351 Teleremote Primary Drilling Project driven by the management of the Los Bronces Mine in alliance with Epiroc. Meet the world's first autonomous electric Epiroc Pit Viper 351.

Epiroc said its ground-breaking Automatic Bit Changer (ABC) is now available for the Pit Viper 351 blasthole drill rig. The ABC enables hands ...

Epiroc announces the release of its ground-breaking Automatic Bit Changer (ABC), now available for the Pit Viper 351 blasthole drill rig. Following the success and positive ...

Key benefits Highly efficient drilling The Pit Viper 351 is one of the most efficient rotary tricone drills

Drilling rig 351

available for drilling 10 5/8 in to 16 in (270 mm to 406 mm) diameter holes. The PV-351 ...

View Manual de partes PV351 Serie 8033.pdf from HIDRAULICA 1104 at Pontificia Universidad Cat#243;lica de Chile. Atlas Copco Drilling Solutions PART LIST MODEL: PV351/E S/N: ...

Equipped with a standard Rig Control operating platform, today's PV-351 sets the bar for reliability when large blastholes are part of the production. The Pit Viper 351 is one of the most efficient ...

The document describes the Pit Viper 351 single-pass blasthole drill rig. It has a powerful rotary head, high bit load capacity of 125,000 lbs, and large ...

Epiroc said its ground-breaking Automatic Bit Changer (ABC) is now available for the Pit Viper 351 blasthole drill rig. The ABC enables hands-free bit changes, leveraging ...

The Pit Viper Series 351 blasthole drill opens the door to new applications and technological solutions. Using either vertical or angle single pass drilling, it can ...

Epiroc offers the most comprehensive line of rotary blast hole drilling rigs in the industry. With a multitude of configurations to choose from you can find the ...
