

Drilling rig automation

2024 Drilling Rigs & Automation Features Innovating While Drilling; Safety and ESG September/October Automation, robotics and ...

In the current oil and gas drilling industry, the modernization of rig fleets has been shifting toward high mobility, artificial intelligence, and computerized systems. Part of this shift includes a ...

As global energy industries undergo digitalization, automated drilling rigs have emerged as key players of a smart oilfield revolution. These ...

Greater efficiency and less downtime for onshore drilling The Precise(TM) automated drilling system gives you full control over your rig's functions from ...

Drilling is a complex interaction of machinery and humans that has radically changed over more than a century in the oil field. Automation has been part of the long, ...

LOGIX(TM) automation and remote operations integrates autonomous drilling solutions that enable superior drilling performance on every well. The steering ...

Schlumberger Autonomous Directional Drilling solutions are built upon four distinct pillars: intelligent planning, intelligent execution, surface automation, and downhole automation.

Efficiency and safety of drilling operations is paramount, which helps explain the focus on them today given current market conditions. Our drilling rig and drill ship automation systems help ...

For some drilling contractors, integrating MPD systems into their rig's automation infrastructure, including hardware, software and procedures, ...

5 days ago; R& D Technical Section Q& A: Drilling Automation--People, Process, and the Rise of Smart Rigs This article is the fourth in a Q& A series from the SPE Research and Development ...

A big step to the rig of the future 0 knowledge transfer loss Today's drilling environment demands faster, safer and more cost-effective drilling. Because operators require optimized and data ...

Explore the future of oil rig automation in our ultimate guide. Discover trends, technologies, and industry insights shaping the sector.

It is challenging. Drilling automation focuses on the drilling system and drilling operations, which entail

Drilling rig automation

combining various subsystems, including the downhole bottomhole ...

It will be able to control more rig systems--fluids, drilling, geosteering--imultaneously. AutoROP is the DrillOps Automate optimized ...

Our cutting-edge digital drilling solutions harness the power of automation to revolutionize efficiency, precision, and safety in drilling operations. By ...

Efficiency and safety of drilling operations is paramount, which helps explain the focus on them today given current market conditions. Our drilling rig and drill ...

Halliburton leads the integration of drilling automation - reducing the silos between rig and downhole sub-systems, drilling and sub-surface, and humans and autonomous system ...

This solution orchestrates autonomous directional drilling with automated wellbore hydraulics and dynamic surface drilling rig equipment ...

Drilling rig automation allows for precision and consistency by removing human error from drilling operations, making the process faster and more reliable. ...

Press Raptor Rig is the world's first fully automated drilling rig. Engineered for the future. Reducing the cost of extraction is how O& G will pull the same profit ...

Drilling automation is developing quickly to keep up with today's drilling standards. Rig Floor Automation from H& P tackles the hurdles longer laterals...

Computer-controlled drilling is slowly changing how the oil and gas industry discovers natural resources. Automated drilling can reduce the number of injuries to zero and ...

Exploration drilling technology is therefore considered ripe for innovation, with numerous companies - from start-ups to stalwarts - vying to bring increased automation to the ...

Intelligent drilling and completion implies using big data, AI, information engineering, control theory, and other advanced transformative technologies in the drilling and completion ...

Whether it's exploration, blast hole, or production drilling, precision and reliability are non-negotiable. At Telemation, we deliver integrated drill rig automation ...

Nabors retrofitted an existing rig - X29 - with RZR (pronounced razor) and has drilled multiple wells for ExxonMobil in the Permian Basin. In 2021, Nabors ...

Drilling rig automation

CADS by HMH is an automation system for rig sequences, reducing the human factor in repetitive tasks and providing operators with real-time information.
