

Drilling rig bicentenario

What is the Bicentenario rig?

BICENTENARIO Pemex contracted the Bicentenario rig in July 2011 for a five-year time period. It is a sixth-generation semi-submersible platform for deepwater and ultra-deepwater drilling, and will drill the Talipau-1 well located in the Gulf of Mexico.

How many people can a Bicentenario rig accommodate?

Constructed by Daewoo Shipbuilding and Marine Engineering, the Bicentenario rig has capacity to drill to a 5,000m depth. It is 138m tall, weighs 58,000 tonnes and has eight engines that allow it to remobilize independently. In addition, the Bicentenario platform can accommodate up to 160 people at a time.

Why did Grupo R buy Bicentenario?

According to Marco Antonio Moreno Gonzalez, Grupo R's Director of Drilling Operations, it was the acquisition of the Bicentenario semi-submersible drilling platform in 2011 that will help Mexico make the leap to deepwater and ultra-deepwater areas.

Who owns the Centenario rig?

The Centenario is property of Grupo R's subsidiary Grupo R Exploracion Marina (Gremsa). Friede & Goldman Lt. designed the rig and Gremsa used it to drill the Nen-1 well 113 km northeast of Coatzacoalcos in Veracruz. The well proved the existence of a large natural gas deposit and the real potential for deepwater drilling in the area.

How many BBL can a Centenario rig carry?

CENTENARIO The Centenario platform can carry over 325,000 bbl and was acquired with an initial US\$50 million investment. This rig can operate in 3,000m water depth and drill 10,000m under the seabed in moderate environments, such as those present in the Gulf of Mexico, East Africa and some Brazilian areas.
