

Drilling rig derrick hand videos

What is a derrickhand rig?

The next position you can obtain is that of the Derrickhand. What Do Derrickhands Do? A Derrickhand sits on the derrick on a drilling rig and guides the stands of the drill pipe into the fingers at the top of the derrick. They may also monitor levels, add chemicals and take care of shale shakers and mud pumps.

What is an oil rig Derrick?

On an oil rig, the derrick is a lifting device, either a crane or framework, situated over an oil well that allows drilling machinery to be raised and lowered. Derrickhands work with mud engineers to monitor pH and calcium levels as well as the weight and density of the mud.

What does a derrick hand do in a pulling Unit Rig?

In the pulling unit rig crew hierarchy, the derrick hands come after the operator/relief operators. The main responsibility of a derrick hand is everything that is above ground on the rig. During laying operations, derrick hands assist the operators/relief operators in inserting boring into the well.

What type of Derrick is used on floating offshore drilling rigs?

On floating offshore drilling rigs, there is a more vital type of derrick called the dynamic type. This derrick consists of welded sections pinned together instead of being constructed using individual bolted beams. Unlike the standard API derrick, the dynamic type does not need frequent dismantling, making it more durable and reliable.

What does a derrickhand do?

Derrickhands work with mud engineers to monitor pH and calcium levels as well as the weight and density of the mud. They also add chemicals to the mud or oil and monitor mud levels in the pits to help with well control. When it comes to shale shakers and mud pumps, Derrickhands also make sure they are running well and fix them as needed.

How do oil rig workers work?

Oil rigs have a hierarchy when it comes to entry-level positions. Most workers will start as Leasehands and work their way up to Floorhand. After being a Floorhand, you can move into a Motorhand position. On a drilling rig, the next position is Derrickhand.
