

Drilling rig head

Geoprobe's 3135GT drill rig has 10,000 ft-lb of torque and 1,000 rpm to power through your geotechnical projects whether they need augering, ...

All KLEMM rotary heads are designed so that they are perfectly matched to the respective drilling system and drilling task. This means that the drives produce the maximum drilling ...

Drilling Supply Store offers a variety of Rotary Drill Heads you need, for your application such as Reverse Circulation (RC), Down The Hole (DTH), Geothermal and Blasting.

Rotating Head "Rotating head" means a rotating, pressure sealing device used in drilling operations utilizing air, gas, foam, or any other drilling fluid whose hydrostatic pressure is less ...

Variety of movements. The MC 22 is the flagship drilling rig in the Comacchio range. Introduced in 1997, the MC 22 was the first drilling rig equipped with the innovative Comacchio mast ...

Understanding the equipment and tools used in drilling rigs is essential for petroleum engineers and drilling engineers alike. These ...

Pressure control tools for any application When drilling scenarios demand precise flow control, Halliburton Rotating Control Devices (RCD) are essential. ...

In the drilling process, the adjustment of drill pipe rotational speed is essential to accommodate the variations encountered in different geological ...

AutoDrill offers a wide range of multi-spindle drilling heads, including adjustable, fixed pattern, and offset spindle heads for metalworking and woodworking applications.

Epiroc is a one of the leading drill rig manufacturers in the world. We offer rock drilling machines and other equipment for many different applications. For ...

Our hydraulic catheads deliver smooth and accurate torque to make up and break out premium and standard drillpipe and drill collars. This is a key capability ...

The Diverter as one of the drilling rig components, is installed on the conductor pipe before drilling of the first phase of the well and is designed ...

Explore the diagram of drilling rig parts, their functions, and how they work together in the drilling process.

Drilling rig head

Learn about key components and their roles in operation.

H Drill head, suitable from B to H rod sizes. Depth rating of 2 600 m on N rods. Dry weight, including Chuck and transmission is 930 lbs. Available across the whole range of AVD Drill ...

Customize your rig and extend the application of your Hütte equipment: ask us to get the best configuration of double rotary head units and drilling tools ...

Our drilling rigs applications can be extended by using drilling accessories: Huette single rotary heads are available in different torque and rotation speed

Two independent rotary heads are coupled to each other: it results in double rotary head units designed to drill with variable speed and torque capacity. ...

The rapid spread of ground source heating systems over the past years has led to an increased use of Comacchio rigs for geothermal drilling applications utilizing dual head drilling systems. ...

Our hydraulic catheads deliver smooth and accurate torque to make up and break out premium and standard drillpipe and drill collars. This is a key capability when it comes to applying ...

TEI Rock Drills manufactures robust hydraulic rotary heads that are designed for smooth operation and simple maintenance in rotary drilling applications such as soil nailing and ...
