What is a drilling rig inspection?

During drilling rig inspections, inspectors conduct detailed evaluations of all equipment and subsystems within the rig. They assess the power plant, housing facilities, electrical systems and marine equipment using checklists. Additionally, these checklists help reduce the risk of unexpected downtime, equipment failure and other costly issues.

What is a monthly drill rig machinery inspection checklist?

Monthly Drill Rig Machinery Inspection Checklists are to be undertaken and saved in the Lucidity 'Inform' module by the Driller/Supervisor. Any corrective actions identified shall be prioritised and action initiated by the Driller/Supervisor. 7.3. Certified Outsourced Equipment and Plant Inspections

How often should a Durock drill rig be inspected?

Annually, each Durock Drilling vehicle, drill rig, compressor, booster, mud pump and trailer shall undertake an annual critical component inspection. These inspections shall be performed by qualified and component maintenance personnel and be documented on the appropriate checklist for the particular plant/equipment.

Who is responsible for drill rig machinery inspections?

It shall be the responsibility of the Driller/Supervisor to ensure these inspections are carried out as per the schedule. Monthly Drill Rig Machinery Inspection Checklists are to be undertaken and saved in the Lucidity 'Inform' module by the Driller/Supervisor.
