

Drilling rig operations video

How many oil drilling rig operation videos are there?

Browse 372 oil drilling rig operation videos and clips available to use in your projects, or start a new search to explore more footage and b-roll video clips. Drone shot of oil pump jacks in Oil City, Kern County, California. This intensive drilling operation is part of the Oil Field in Bakersfield, California, USA.

How does a conventional drilling rig work?

The drill stem lifted up to the ground from the well deposits much potential energy, and when the drill stem is lowered down to the well, the deposited potential energy is released. The conventional drilling rig just wastes this energy by braking and this energy cannot be recovered.

Who operates the drill rig?

Operator or Driller: A person operating the drill rig. They may also be the driver of the rig if it is a carrier mount. Working Area: An area near a drill rig where its tools and or material are moved to carry out the installation of an anchor or micropile element.

What types of drilling rigs are available?

The drilling videos featured here on our website showcase the capabilities of various types of drilling rigs, including water well drilling, auger drilling, core drilling, and more.

What does a drilling rig operator do?

The operator is responsible for preparing a sound location capable of properly supporting the Drilling Rig. They are also in charge of a conductor pipe program adequate to prevent soil and sub-soil wash out.

What rig is used in the video?

The rig used in the video is one of the most advanced land rigs in the industry with top drive, Iron Roughneck™, and automated catwalk. The drilling portion of the video is followed by well completion. The video shows both the surface and animated-downhole process for multi-stage hydraulic fracturing.
