Can a drill be used as part of a rig?

Some rigs have a drill installed centrally within the body, which doubles as a lab area. A rig that uses the drill to push the drill string into the ground and only relies on rotation to crack or make connections is not subject to this guidance.

How do drilling engineers choose a drilling rig?

After geologists develop a prospect and define desired well locations, and a surveyor spots the exact well location on the surface, the drilling engineer selects the rig. The drilling contractor then defines his rig requirements with respect to surface space, rig weight, turnarounds, and footing.
