This work presents a time-domain solution to the system of equations that model the dynamic behavior of the riser and casing strings, when connected for well ...

drilling riser 1. n. [Drilling] A large-diameter pipe that connects the subsea BOP stack to a floating surface rig to take mud returns to the surface. Without the riser, the mud would simply spill out ...

The marine riser forms a continuation of the well bore from the top of the blowout preventer stack to the drilling vessel. The subsea well is drilled through the marine riser allowing the mud to ...

A marine riser system provides a fluid conduit to and from the wellbore--that is, it extends the wellbore from the subsea BOP to the drilling rig. It also supports auxiliary lines, such as high ...
