What are drilling slips used for?

Drilling slips are used to support the strings' weight by wrapping around the string to exert even pressure and hold the string in place when set. Safety clamps are then used in conjunction with the slips and are adjustable to a variety of tubular sizes. Manual Tongs are used for holding back up when making up tubulars in the rotary.

What is a drill rig?

In the simplest terms, a drill rig, also called a "drilling rig" or just "rig," is a machine or equipment that's used to create holes, or "wellbores," in the earth's surface in order to drill for oil, natural gas, water, or other resources.
