What is rig system?

RIG SYSTEM Generic word used in two ways:- A plant /unit for drilling a hole in the ground. OR A machinery system which is used to make a hole in the ground. OR A system which is composed (made) of various mechanical & electrical sub systems /equipments for drilling a hole into the ground.

What is a rotary rig?

Rotary Drilling Process Rotary table rotates the drill string Downward force applied to the bit Cuttings are lifted to the surface by circulating a fluid down the drill string. Main Component Parts of a Rotary Rig are:- 1. Power System 2. Hoisting System 3. Fluid Circulating System 4. Rotary System 5. Well Control System 6.

What are the different types of drilling technologies?
