

Halliburton Otis R® landing nipples are selective by running tool and are run in the well on the completion tubing to provide a specific landing location for subsurface flow control equipment.

"Nipple up" is a critical step in drilling and well completion, requiring precision, expertise, and stringent safety protocols. Its successful execution ensures the safe and efficient production of ...

What is a "Nipple" in the Oil Field? In the context of oil extraction and production, a nipple is a tubular pipe which is threaded on both ends, and ...

Bell Nipple (Mud Riser, Flow Nipple) A piece of pipe, with inside diameter equal to or greater than the blowout preventer bore, connected to the top of the blowout preventer or marine riser with ...

The Drawworks is one of the most important components of the drilling rig (types of drilling rigs). The unit supplies the hoisting power, the ...

Active drilling mud from the Trip Tank is circulated across the hole, and valves in the flow line near the Bell Nipple are realigned to send the fluid returns back to the Trip Tank, forming a very small circulating system.

Welcome to the Drilling Rig Interactive created by the TOP Energy Training university consortium of The University of Texas at Austin, Penn State University and Colorado School of Mines. ...

This article outlines essential tripping considerations for effective tripping, focusing on trip tanks, slugs, pumping out, tripping-in techniques, and ...

Diverter system In Drilling oil and gas Rig is a major equipment in well control. Here, we introduce its applications, procedure & diagrams.

The Halliburton Otis ® RPT ® no-go landing nipple system provides a means of running a series of positive location landing nipples in a tubing string with minimum restriction. Otis RPT no-go ...

Tripping The Drilling Supervisor will be on the rig floor from start of the trip out of hole until the string is in cased hole. Prior to starting the trip (during circulating bottoms up) check the ...

Do not trip when filling up a trip tank Perform trip drill with crew every trip if possible Toolpusher should be on rig floor for at least first 10 ...

In the oil and gas industry, there are a number of terms which have specific meanings which probably

Drilling rig trip nipple

wouldn't be used in any other context, ...

Rotating control head technology has become a key element in many drilling programs, lowering drilling costs and increasing well productivity. Lower drilling costs are ...

The video provided a detailed explanation of how landing nipples are essential components in well completion and workover operations. It covered their ...

Pressure control tools for any application When drilling scenarios demand precise flow control, Halliburton Rotating Control Devices (RCD) are essential. ...

Seating and landing nipples provide a reduced ID in the tubing string and a polished bore to anchor and seal a flow control device, with or without locks.

To make the system work on the TLP, the team landed the drilling riser lower than usual, and devised a modified bell nipple overshot, bell nipple, ...

How the trip tank work? While Tripping Out of Hole (TOH), a trip tank pump will circulate mud into a bell nipple in order to keep the hole full all the time and ...

Each trip tank has a pump which will suck the fluid from the tank and pump into the well via the fill up line connected to a bell nipple under the ...

Trip tank function during operation Each trip tank has a pump which will suck the fluid from the tank and pump into the well via the fill up line connected to a bell ...

Drilling ?? Carry out drilling operation in accordance with the drilling program. ??????????. Prepared bell nipple. ???????. Make up 2 ...

An enlarged pipe at the top of a casing string that serves as a funnel to guide drilling tools into the top of a well. The bell nipple is usually fitted with a side outlet to permit drilling fluids to flow ...

What is trip in oil and gas? Tripping refers to the process of removing and/or replacing pipe from the well when it is necessary to change the bit or other piece of the drill ...

Drilling rig trip nipple
