

Drilling rig well data

What is the Daily rig count?

The Enverus Drillinginfo Daily Rig Count is the most accurate and up to date rig count in the energy industry! 0% change from previous week. Last updated 2025-08-28. Enverus revolutionized the rig count process by tracking more than 95 percent of the U.S. rig fleet on a daily basis, primarily through the use of GPS units.

What information does enverus rig analytics include?

In addition to the information you see here, Enverus Rig Analytics includes well operator, lat/long location, driller, rig specs, and other important attributes at the well and rig-level. For more information about the full Enverus Rig Analytics offering please contact DrillinginfoSupport@enverus.com.

Who provides the working rig location information?

The working rig location information is provided in part by Enverus. The Investor Relations website contains information about Baker Hughes Rig Count's business for stockholders, potential investors, and financial analysts.

Why is data important in oil and gas rigs?

Clarity is paramount in the intricate world of oil and gas rigs. Data is not just a valuable decision-making tool but also the eyes that provide drilling contractors and operators with a transparent view of their operations. Without this insight, you are navigating in the dark. Managing diverse data sources and multiple formats is challenging.

What information is included in a well report?

Well Information includes information on borehole activities such as drilling activity, counts on the number of boreholes completed, and number of shut-in's. Additional information includes the lease number, well name, spud date, the well class, surface area/block number, and statistics on well status summary.
