

Drilling rigs dropping rapidly

U.S. oil and gas drillers are slowing down drilling activities, as evidenced by a consistent decline in active rig counts across major basins in 2024 and 2025. This slowdown is ...

The number of rigs drilling for oil and gas is falling. Yet, the U.S. is poised to set new oil and natural gas production records this month. This ...

Learn more about rotary drilling rigs 4 Percussion Drilling Rigs These rigs function by repeatedly lifting and dropping a heavy drill bit into the ...

The total number of active drilling rigs for oil and gas in the United States fell yet again this week, according to new data that Baker Hughes ...

The latest Baker Hughes rig report, released on January 10, 2025, indicates a drop in U.S. oil and natural gas drilling activity for the first time in six weeks. The rig count, a key ...

Drillers reacted quickly to last week's tariff-fueled energy market turmoil, sending drilling activity lower for a third consecutive week. Oilfield ...

The drill rig doesn't actually push the pipe down at all. In fact, a drill rig is a glorified crane. The weight of the drill string alone can be a million pounds whereas only on the order of 25,000 ...

Advancing the Drilling IndustryDropped Objects No complicated procedure is necessary to eliminate the causes of falling object incidents. One need is the establishment of ...

Drill string vibrations can significantly impact the performance of oil and gas drilling operations. They can lead to premature wear and tear of ...

The part of the drilling line running from the drawworks to the crown block is called fast line because it moves as the driller raises or lowers the traveling block greater velocity than any ...

Smaller fracking companies are feeling the pinch of inflation, lower oil and gas prices, and fewer prime drilling spots.

The most recognizable icon of the oil and gas industry is a derrick towering high over the wellsite. The drilling rig represents the culmination of an intensive ...

The falling number of oil and gas rigs deployed across the United States is reaching a level that would indicate

Drilling rigs dropping rapidly

onshore crude output from the world's top producer could fall in ...

The total number of active drilling rigs for oil and gas in the United States fell yet again this week, according to new data that Baker Hughes published on Friday, following a 3 ...

This slower drop is due to lower drilling costs compared to Haynesville, allowing some operations to continue despite the weak prices. ...

Water is obtained by hand pumps constructed above shallow (less than 60 m deep) boreholes in many developing countries. However, if typical machine drilling rigs are ...

Drilling in the U.S. shale patch declined at the fastest pace in almost two years as mounting international trade tensions threaten to stifle energy demand.

Changes in the number of oil rigs have historically followed changes in oil prices with a lag time of about four months. However, the ...

Ranging in size from small, limited access drilling rigs to large platform/big performance sonic drilling rigs, our drill rigs cover a range of applications.

The number of active rigs drilling for oil and gas in the U.S. fell by 4 to 580 to its lowest level since December 2021, Baker Hughes said.

The U.S. rig count has seen a significant decrease, dropping from approximately 780 rigs at the start of 2023 to around 620 rigs currently. Yet, ...

Slowing drilling activity in the U.S. shale patch is capping oil production growth while natural gas output is down from year-ago levels amid ...

Here is the average count of rigs by month: The impact of the Great Recession hit the rig count in late 2008 and early 2009. I think the drop ...

The US energy sector has witnessed a significant shift in drilling operations, with the latest Baker Hughes report revealing the first decline in oil ...

The shale patch is shedding rigs at the fastest pace since the height of the Covid-19 pandemic despite healthy oil prices. Behind the drop in ...

The number of rigs seeking crude oil fell by six rigs to 472 for the week, down 27 rigs or 5% below the 499 seen last year. The number of rigs drilling for natural gas rose one rig ...

Drilling rigs dropping rapidly

(Bloomberg) - Drilling in the U.S. shale patch declined at the fastest pace in almost two years as mounting international trade tensions threaten to stifle energy demand.

Why Rigs Drop In Value So Fast ??You might think it's wild, but a rig can lose 20 to 30% of its value in the first year, even if it's only a week old. Sounds crazy, right? But it's just like cars.
