

Drillmax dm250 for sale

What is a dm250 small drill used for?

DM250 small drill for residential water well or geothermal drilling where limited access is a priority. Drillers seeking efficiency for water well drilling or geothermal drilling jobs choose the DRILLMAX ® DM250 by Geoprobe ® for its top head rotation speed combined with 20-foot stroke all under Class A/B CDL requirements.

What is a dm250 water well drill rig?

Under Class A/B CDL requirements, the DM250 water well drill rig makes it economical to mobilize and staff. DM250 small drill for residential water well or geothermal drilling where limited access is a priority.

How deep can a dm250 drill rig be used?

No more worrying about tearing up driveways or yards makes this rig a smart choice for everyday use. Set up with centrifugal or piston mud pump and development air to meet your job needs. Many who use the DM250 focus on drilling shallower than 300 feet, though the machine can exceed that depth.

How does a dm250 mud rotary drill rig work?

Leveraging power of DM250 mud rotary drill rig to conduct wireline coring, increasing productivity of sampling to determine best clay quality on a kaolin mine. In the past, Michigan site conditions required multiple days to drill 160-foot water well while new DM250 completes water well in just five hours.

Why should you buy a dm250 rig?

Owners describe their DM250 as their most productive and versatile rig, praising its simple operation for making it easy to train new operators. Save money by mobilizing 200-feet of pipe while staying under class A/B CDL requirements, eliminating concerns over having enough 20-foot pipe to finish the job or having to find a CDL driver.
