

Electric vehicle air compressor steering pump

How does the E-varioserv ® power steering pump work?

Focused on maximum efficiency. The e-Varioserv ® power steering pump lowers the temperature in the steering system and significantly reduces fuel consumption and CO 2 emissions. The e-Varioserv ® power steering pump supplies exactly the right amount of oil that is needed for operating hydraulic steering systems in commercial vehicles.

What are electric air pumps for cars?

Electric air pumps for cars offer a convenient and efficient solution to this problem. These portable devices plug into your car's cigarette lighter or a standard outlet, providing a quick and easy way to inflate or deflate tires. Electric air pumps for cars come in various sizes and designs, offering different features and functionalities.

How does a dual power electric steering pump work?

But at a high speed, the steering is more stable. The dual power electric steering pump operates using both a high voltage battery pack (DC540V) and a low voltage battery (DC24V). If the high voltage supply disconnects suddenly, the low voltage system takes over, allowing the electric power steering to function seamlessly.

What is an electric air pump?

An electric air pump is a small, portable device that plugs into your car's cigarette lighter or a standard outlet. It is designed to inflate tires quickly and easily, with some models capable of reaching up to 150 psi. Electric air pumps are also great for inflating other items, such as inflatable rafts, balls, and even air mattresses.

What is electric power steering (EPS)?

What is EPS? EPS (Electric Power Steering) uses an intelligent electric motor to assist with steering. The EPS control unit calculates the optimal steering assistance based on real-time driving conditions, ensuring smooth and responsive vehicle handling.
