

Export pneumatic rock drill

What is a pneumatic rock drilling machine?

A pneumatic rock drill drives the piston forward in the cylinder with compressed air, which makes the drill bit hit the rock. With the advantages of simple structure, easy operation, and low price, the pneumatic rock drilling machine is the most widely used rock drilling machine.

What are pneumatic rock drills used for?

Commonly used for civil engineering projects, pneumatic rock drills are used in the demolition of buildings, dredging out harbours and crushing rocks during the groundworks phase of the project. These tools break into rock formation by using a chiselling action, as opposed to a rotary one.

How do I choose a pneumatic rock drill?

There are many things to consider when choosing a pneumatic rock drill, as drills come in several weight classes and sizes. The smallest pneumatic hand drill weighs in around 8 pounds while the largest sinker drills can weigh in near 70 pounds. The first thing you want to determine is the hole diameter and depth you want to reach.

What is a Joy Air Rock Drill?
