

Fast moving drilling rigs

What is a fast moving rig?

Designed for extra fast relocation, Highdrilling fast moving desert rigs are moved as a complete unit, including mast and substructure. With the time to spud a new well reduced to about one day, our fast moving rigs save our customers a significant amount of money, especially in drilling pad operations. How Does a Fast-Moving Rig Work?

What is 3rd generation fast moving drilling rig?

The 3rd generation fast moving drilling rig is required to be installed at the first drilling; and generator set, electric control room, TD electric control room and mud pump unit can achieve fast moving, which can reduce installation moving greatly and achieve breakthrough at the rig module, movement and reliability.

How long does it take to move a rig?

0oC-55oC and humidity <=100%. Equipped with state-of-art technologies, the rig can be relocated within a distance of 10km in 48 hours. For moving, the whole substructure is uplifted by 8 lift cylinders installed at the 4 corners of the substructure. Pins are used to install the dolly.

Which rig is best for drilling lateral sections?

The latest breed of our legendary ADR#174; is a more powerful, agile rig to drill long lateral sections in horizontal wells and execute rapid moves from pad to pad, the ADR#174; 1500S. Our ASR(TM) 150 is the industry's most advanced service rig.

What is a maverick rig?

The Maverick fast-moving rig combines easy and fast rig-up and rig-down with a high level of structural strength. Able to handle the harsh challenges of high-volume horizontal drilling and move quickly, the Maverick rig has a proven track record of enhancing drilling efficiency in some of the world's most demanding pad drilling applications.

What types of fast moving rigs does Kerui offer?

KERUI hold three models of fast moving rigs, modular fast moving rig, trailer mounted fast moving rig and whole towed fast moving rig. Contact us and learn more.
