

Fugro drilling rig

Fugro Seacore's design and engineering team was tasked with manufacturing a versatile modular drilling rig that could be rapidly mobilised ...

Discover how Fugro's cutting-edge technologies and expert consultancy services are overcoming challenges in the offshore wind industry. From advanced data ...

The R30 drill rig spread includes a fixed telescopic folding derrick rig, mud mixing and pumping unit, as well as other tools and ancillary equipment for geotechnical drilling ...

Meet the new generation of CPT. Safer, smarter and ready for net zero, Electric Deep Drive™; transforms testing in emissions-regulated environments. With deeper investigations, ...

Seafloor Drill I (SFD-I) Water Depth Rating: 4,000m Weight in Air: 8,000kg or 9T System Dimensions: W = 3.8m, L = 5.4m, H = 6.6m Drilling Specifications: Standard Geotechnical ...

Load drill pipe, mud, and equipment. Lead the drilling operations of the rig by handling drill pipe, mixing drill mud, and handling casing and other equipment. Drive equipment to and from the ...

Fugro use Royal Eijkelpamp sonic rigs equipped with the Monitoring While Drilling system to collect more data for the foundation design of a Saudi giga project.

EQUIPMENT SHEET FUGRO FUGRO EXPLORER The Fugro Explorer is an experienced and versatile DP2 geotechnical deepwater vessel. GEOTECHNICAL DRILLING The Fugro ...

Discover Fugro the world leader in Geo-data solutions, empowering sustainable development and enhancing safety. Explore how our expertise supports the ...

As part of the Fugro Group, Seacore provides comprehensive UK and overseas geotechnical, geoenvironmental and geophysical site investigation and survey services, covering all aspects ...

A mobile drilling platform developed by Fugro that switches seamlessly between land and shallow water work has won the Equipment ...

Alan Dougan Fugro GEOS Donogh Lang MCS Kenny Serious incidents associated with deepwater drilling operations and challenging environmental conditions such as high currents ...

The Fugro-operated, 88-metre (290-foot) PSV Fugro Zephyr was originally built in China in 2019 and

Fugro drilling rig

previously sailed under the name Sea Goldcrest. The conversion was done ...

Geophysical, metocean and environmental scopes of work are currently underway, while geotechnical services will commence later this month, using a newly ...

Learn how Fugro's advanced drilling solutions achieved precise shaft construction in the challenging geology of EDF Hinkley Point C.

Fugro offers cutting-edge maintenance solutions that can help clients enhance efficiency and lower expenses. Explore our expertise in this field for more information.

Working from a third-party vessel, the Fugro C30 mobile rig will deliver Atlantic Shores efficient, heavecompensated drilling capabilities, as ...

Fugro conducted a ground investigation for the refurbishment of Hammersmith Bridge in London, which included cone penetration testing (CPT) and ...

Utilising our new sonic drilling rig, we completed 10 boreholes in replacement of the vibrocore requirement which were much better suited for the environment. ...

Remontowa Shipbuilding in Poland has completed conversion work on a platform supply vessel (PSV) to enable it to be used for geotechnical drilling in support of the offshore ...

"Our drilling rigs and associated equipment are custom built with specific markets and projects in mind," explained Alun Jones of Fugro Seacore.

Fugro offers offshore survey and installation solutions for the Alder Xmas Tree project, ensuring secure and productive operations for our clients.

SERVICE FLYER FUGRO ROTARY DRILLING TECHNIQUES In commercial and industrial sectors, increasingly sophisticated Plant, equipment and drillers ...

Fugro has reached an agreement to acquire two platform supply vessels, Sea Goldcrest and Sea Gull, which will be used as geotechnical ...
