

Global drilling rig technologies of nov

Currently running on more than 140 land and offshore drilling rigs worldwide, NOVOS structures data and defines activities that enable engineers to develop lessons learned and apply/scale ...

NOV Rig Systems provides comprehensive aftermarket products and services to support land and offshore rigs and drilling rig components. We bring together ...

NOV has combined full process automation, data integration and analytics with a robust support structure in land and offshore drilling operations. In addition to pioneering automated pipe ...

National Oilwell Varco (NOV) has expanded its leadership in oilfield services through strategic acquisitions and subsidiaries. By strengthening expertise in drilling, rig ...

NOV's Operational Framework NOV's operational framework is structured around three main segments: Rig Technologies: This segment focuses on the design, manufacture, and support ...

Digital solutions are dramatically changing the way we work. Sensor networks and edge devices are collecting data from capital equipment that can be analyzed and turned into algorithms that ...

We will continue to introduce innovative technologies that address drilling needs globally and locally that are fit for purpose and meet the value objectives our clients have ...

Rig Products About Canrig Canrig® is a global supplier of rig technology used to enable safe, efficient and responsible drilling operations. Founded in 1995, Canrig is vertically integrated ...

NOV is a leader in the design, manufacture and sale of equipment and components used in oil and gas drilling and production operations, and the provision of the oil and gas industry.

The agreement will enable customers to combine Schlumberger surface and downhole drilling automation solutions with NOV's rig automation ...

A worldwide leader within the oil and gas industry, NOV provides major mechanical components for land and offshore drilling rigs, complete land drilling and well servicing rigs, ...

NOV Rig Technologies designs and manufactures high-end drilling rigs and equipment--such as top drives, drawworks, blowout preventers, mud pumps, and pipe ...

NOV operates through three primary business segments: Wellbore Technologies, Completion & Production

Global drilling rig technologies of nov

Solutions, and Rig Technologies. The company maintains operations in ...

Downhole Technologies As industry pioneers, we conceptualize, design, and supply groundbreaking performance drilling, directional drilling, and ...

Pressure control is a critical part of the drilling process, and, as a fail-safe component, a blowout preventer is essential to the safety of your rig. Our ...

Our comprehensive drilling automation portfolio consists of intelligent control systems, material handling technologies, and remote visualization solutions. These industry-leading products ...

National Oilwell Varco is a worldwide leader in the design, manufacture and sale of components and systems used in oil and gas drilling and production, tubular inspection, downhole tools, ...

The agreement will enable customers to combine Schlumberger surface and downhole drilling automation solutions with NOV's rig automation platform to deliver superior ...

Our land drilling rig systems give you an edge in today's most challenging drilling environments. Learn more about our high-tech drilling rig systems.
