

Halliburton drill rig count

Where can I find rig count and drilling data?

Find U.S. and Canadian rig count and drilling data, and use Oilprice.com's graphing tools to compare oil prices, frac spread, production and drilling data per basin or province.

How can Halliburton improve drilling performance?

Achieve improved drilling optimization and performance with customized drill bits, in-bit sensors, and advanced rotary steerable systems. Halliburton's innovative technologies reduce well time, increase the rate of penetration, and optimize bit performance throughout runs. We custom-engineer drill bits for your specific formation challenges.

How many rigs did Halliburton sell in Q4 2021?

The total number of rigs increased from 1,332 in Q4 2020 to 1,352 in Q4 2021, making a slight increment of 1.5% on a year-on-year basis. However, it decreased by 4.72% on a quarterly basis, from 1,419 in Q3 2021 to 1,352 in Q4 2021. Halliburton generates a major part of its revenue from the selling of rigs in the International regions.

Why should you use Halliburton Drill bits?

Halliburton's innovative technologies reduce well time, increase the rate of penetration, and optimize bit performance throughout runs. We custom-engineer drill bits for your specific formation challenges. Our rotary steerable systems navigate complex well profiles with precision.

When is the rig count released?

The North American rig count is released weekly at noon Central Time on the last day of the work week. Starting in February 2020, the international rig count will be released on the last working day of the first week of the month. The Baker Hughes Rig Counts are an important business barometer for the drilling industry and its suppliers.

What does active rig count mean?

When drilling rigs are active they consume products and services produced by the oil service industry. The active rig count acts as a leading indicator of demand for products used in drilling, completing, producing and processing hydrocarbons.
