How to drill a HDD in rock?

Arguably, bit selection to obtain optimum drilling efficiency and economy for the given ground conditions is the most critical issue for HDD in rock. Pilot holes can be drilled using rotary, roller cone or percussive techniques depending on the mechanical properties of the material to be drilled.

What is Hardrock hddp hammer system?

Discover the Hardrock HDDP difference. The ROCKWYRM Air Hammer System by Hardrock HDDP is engineered for steering precision, packs a powerful punch, and is built tough to withstand challenging rock conditions. The hammer assembly along with the oiler support packs, pilot hole reamers, bits and pull-backs, can tackle any rock drilling project.

Why is bit selection important for HDD in rock?

Bit selection to obtain optimum drilling efficiency and economy for the given ground conditions is the most critical issue for HDD in rock.

What are the best practices for HDD reaming in rock structures?

We have put together the best practices for HDD (horizontal directional drilling) reaming in rock structures. Ease the reamer into cutting and allow it to cut its own pattern for 3 to 5 feet before increasing pull forces, particularly when there is a transition from soft rock to hard rock.

What is a PDC rock drilling bit?

However, if you need production and are into the hard stuff often, you should consider a polycrystalline diamond compact (PDC) bit. Often used for oil drilling, PDC rock drilling bits feature carbide cutters coated with diamond dust instead of the plain diamond.

What type of rock is used in DTH drilling?

Rock types include hard limestone, granite and basalt. DTH drilling uses a pneumatic hammer directly behind a carbide impregnated drill bit. The bit is held against the rock surface under load and the impact from the hammer shatters the rock.

Terra-Bore offers the largest selection of underground tooling and equipment for HDD Drilling, Vibratory Plowing, Compaction Boring and more. All Triple D ...

Looking for HDD reamer for your drilling rig? Universal HDD offers a wide range of HDD reamers compatible with all major brands like Vermeer and Ditch Witch. Our reamers feature heavy ...
