

How about the Portuguese rock drill

What are the different types of rock drilling?

Types of Drills: The landscape of rock drilling is vast, with rotary, percussion, diamond, and masonry drills catering to different needs. Choosing the right type can greatly affect not just efficiency but also the quality of the drilling performed.

How do I choose a rock drill?

Here's a breakdown of the critical elements that should guide your decision-making when venturing into rock drilling. The nature of the rock dictates which kind of drill will perform best. Soft rock, like sandstone, may respond well to rotary drills, while hard rock, such as granite, demands robust percussion or diamond drills.

Do you need personal protective equipment for rock drilling?

Every drill operator knows that the best way to avoid injury is to be equipped with the proper gear. The right protective equipment acts as the first line of defense against hazards that are part of the rock drilling landscape. Wearing personal protective equipment (PPE) isn't simply recommended; it's essential. The critical items include:

Why should you use a percussion drill?

Performance on Hard Rock: Especially useful for drilling through granite and other dense materials. Speed: Generally can drill faster than a rotary drill when dealing with tougher surfaces, drilling quickly while minimizing heat and wear. When precision is paramount, using a percussion drill can make a substantial difference.

How do I choose a percussion drill?

In softer rock, a rotary drill may suffice, but harder materials may necessitate a percussion drill. Time Efficiency: Selecting a drill capable of expediting the drilling process ensures that the overall project timeline stays intact. The right drilling equipment can prevent project delays and cost overruns, making it an essential area of focus.

What is a deeprock Auger rig used for?

DeepRock® manufactures commercial auger rigs for geo-technical applications such as pollution and contamination work, environmental and soil sampling, monitor wells, sink-hole investigation and highway construction. Hydra-Drills have been the standard by which all portable drilling rigs have been judged since 1962.
