OverviewTypes of deepwater drilling facilities2010 Deepwater Horizon oil spillSee alsoExternal articlesDrilling in deep waters can be performed by two main types of mobile deepwater drilling rigs: semi-submersible drilling rigs and drillships. Drilling can also be performed from a fixed-position installation such as a fixed platform, or a floating platform, such as a spar platform, a tension-leg platform, or a semi-submersible production platform. 1. Fixed Platform - A Fixed Platform consists of a tall, (usually) steel structure that supports a de...
