

How much does a 45 cubic meter diesel air compressor cost

Should I buy a diesel air compressor?

If you need the kind of superior torque that's often required to power more industrial equipment or you want the lower running costs of better fuel economy and reduced maintenance, then a diesel air compressor may be the right option for you. These devices are used widely for both industrial and outdoor applications, such as forestry.

What is a diesel air compressor?

Diesel air compressors provide the performance of a truck engine-driven compressor with the ability to run independently. When used as part of a fleet operation, diesel compressors can reduce engine idle time while also decreasing emissions and maintenance costs.

How much does it cost to run a compressor?

Today, an electricity cost of \$0.12/kWh to \$0.20/kWh or more may be more appropriate. At \$0.12/kWh, this compressor will cost about \$10,000 per year to run, based on the hours of use shown in the example. This calculating is just to give you an idea, research the cost of energy in your area and apply it to this formula!

How much power does a diesel air compressor have?

Diesel Compressor, 80 CFM and 100 PSI, with Optional 6 or 7.5 kW Generator. Portable air compressor that delivers 375cfm at 150 PSI and operates with a power rating of 134 HP. 536 HP portable single-stage rotary screw compressor, 1600/1400 CFM, 150/200 PSIG, Cummins or Caterpillar engine options.

Can diesel air compressors be considered portable?

Both gas and diesel air compressors are more portable than electric air compressors since they do not always have to be hooked up to an electrical supply. Diesel air compressors, including towable ones, do not come with the concern of losing access to pressurized air due to a power outage.

How much does a 50 HP compressor cost?

When you do the math, you'll see that this 50 HP compressor, will cost \$4,887.00 per year in energy operating costs! Today, an electricity cost of \$0.12/kWh to \$0.20/kWh or more may be more appropriate. At \$0.12/kWh, this compressor will cost about \$10,000 per year to run, based on the hours of use shown in the example.

The average cost of replacing an AC compressor is usually between \$400 and \$1200. This includes \$200-\$1000 for the part and 2-6 hours of labor, which will cost you anywhere from ...
