

# How much does a Korean down-the-hole drill cost

What is a down the hole drill?

A "down the hole" (DTH) drill is a piece of drilling equipment used in mining, construction, and exploration activities. It is specifically designed for drilling large-diameter holes in hard rock formations.

What are the advantages of DTH drilling?

DTH drilling offers several advantages, including high drilling speed, efficient energy transfer, and the ability to drill deep, straight holes even in hard rock formations. It is commonly used in applications such as mineral exploration, blasthole drilling, foundation drilling, and water well drilling.

Who is top drill & Daegun?

Top Drill Co., Ltd is a manufacturing company specializing in down the hole hammers and bits. It has some proprietary technology patents in its manufacturing. In Korea, it is reputed to be the best in development, quality, and back-up service in this business. This gives us a 40% advantage over ... Daegun was established in 1992.

What is a blasthole rig & Drill?

Blasthole rigs and drills don't need much explanation. They're used for drilling a hole into the surface of the rock, packing the hole with explosives and then detonating those explosives in the blasthole to break up rock and hard minerals to make it easier to remove.
